

The Laundry POD is a portable, eco-friendly washer designed for washing small loads of laundry using a minimal amount of water and ZERO electricity. Winner of the Best Greener Gadget award and Top Global Innovation GIA award! The Laundry POD features a manually operated spinning system for washing your garments and then extracting the water for the shortest drying time. It is more convenient than hand washing, and great for washing delicates. Compact enough to be portable, but serious enough to stand up to tough laundry challenges. The Laundry POD is perfect for dorms, apartments, camping or anyone looking to add a little green to their laundry routine. Save money, time and effort while helping the impact. It fits under your sink and into your life indoors and outdoors! The Laundry POD puts a whole new spin on clean.

The Laundry POD does not require Energy Star testing due to the fact that no energy is required to operate.
