

GOJI Berry Bush

Goji Berry bushes make perfect patio plants. Goji Berries have several health benefits that include protecting your eyes and skin, improve depression, antioxidants, and many more benefits.

Truly low maintenance, they can be grown anywhere outdoors: on a deck, a balcony, or a patio. Lend bright, lively color to your space while yielding delicious fruit for healthy snacking.

Plant Type:	GOJI Berry Bush	
Bloom Time:	Spring	
Shipped Size:	12-24" tall	
Mature height:	As desired, by pruning	
Origin:	Product of USA; grown from cultivated stock	
Light:	Prefers sunny location	
Hardiness:	Zones 5-9 outdoors	

Care Instructions

This goji berry variety will adapt well to the growing container it arrives in. This specific variety has been selected based upon your region. Goji berries require at least 6 hours of sunlight daily. Water thoroughly on a regular basis while letting the surface soil dry between watering. Do not over water and make sure the pot drains thoroughly.

Prune by pinching back the tips of new growth towards the interior branches. Remove any new growth or stems near the soil level. As the bush grows over the years transplant it to a larger, well-draining container as needed.

Chocolate Bark

- 200g dark chocolate
- 1/4 tsp vanilla extract
- 2 tbsp pistachios (shelled and halved)
- 2 tbsp goji berries
- 1 tbsp desiccated coconut

1. Line a dish with baking parchment. I used an 8x8in dish but you can use a smaller or bigger one depending on how thick or thin you want your bark to be.

Sit a heat proof bowl in a pan of boiling water over a medium heat. Break the chocolate into small pieces, add to the bowl and stir continuously until it has all melted. Add the vanilla and mix well.

Pour the melted chocolate into the parchment lined dish. Top with the pistachios, goji berries and coconut.

Place in the fridge for 30 minutes or until the chocolate has set.

Store in the fridge for up to 1 week
