

⚠ CAUTION: Read this before installing decorative glass

- Decorative glass pieces are heat-resistant when used with standard gas fireplaces and under non-extreme heat conditions.
- Wet glass should never be placed on a fire; allow them to dry completely before burning. Though rare, wet glass could crack or pop out when they become hot.
- After several burns, the glass may develop a residue or discoloration from charring. Wash with lukewarm water and soap to remove these stains.
- This glass may be used alone or in combination with decorative fire stones or lava rock.

Follow all instructions included in your fireplace owner's manual.
