

A replacement weatherseal for storm doors and windows. Allows for easy sliding of storm doors and windows with minimum friction. Cushions, insulates and seals out drafts, dust and moisture. Saves energy and money year-round.

Easy to Use:

1. Remove old weatherseal and clean retaining groove thoroughly.
2. Cut replacement weatherseal to correct length.
3. Remove paper backing. (To slide into channel or groove, leave paper backing on adhesive surface.)
4. Begin at one corner, press pile weatherseal into retaining groove along length of door or window.
5. Use screwdriver or other blunt tool to press other edge into groove.
