

## Van Zyperden Woodland Plant Tennessee Ostrich Fern- Set of 3 Roots

The 'Tennessee Ostrich Fern', a glade fern, produces stately fronds which grow upright and are vase-shaped. Ferns make for nice back ground in the garden to create a woodland setting. Although it prefers shade it will grow in full sun as well. It's non flowering, and at its most beautiful in spring when the fronds start to unfurl. Very low maintenance, just take care at time of planting. It will multiply quickly by rhizomes to form colonies. Deer resistant.

**Plant woodland plants to assure their survival**

**Perfect companion for our Trillium and Virginia Bluebells**

**Tolerates heavy shade**

**About This Variety:** Excellent selection for wet areas along ponds, streams, water gardens or in bogs. Also grows well in shaded borders, woodland gardens, wild gardens or native plant gardens.

**Growing Instructions:** Part shade to full shade is preferred. Regular watering and a layer of mulch are beneficial.

**Care Tip:** Equally happy in average or moist soil; it will grow in sun with constant moisture. Not fussy, adapts well to less than ideal conditions. Cut back fronds as they die out in hot summers.

**Exposure:** Partial to full shade

**Height:** Grows 36" tall

**Spacing:** Plant 18" apart, just below soil level

**Blooms:** Blooms spring

**USDA Zones:** Hardy in USDA zones 4-9
