

# LED Smart Bulb

Control Your Lights Using Apple HomeKit™

**Feit Electric HomeKit Bulbs  
Firmware Update for iOS 13.**

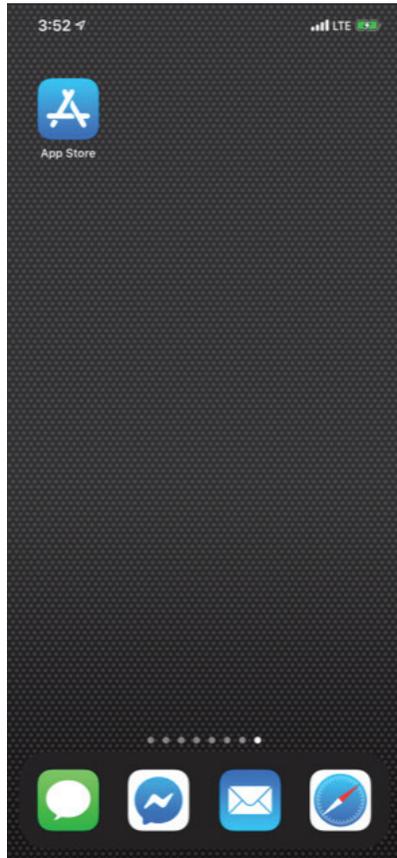

**Troubleshooting Guide**

# Feit Electric HomeKit Bulbs Firmware Update for iOS 13.

Install and turn ON your HomeKit bulb. Complete the following before adding the bulb to the Apple Home App.

**Note:** Set your mobile device Auto-Lock feature to "Never" in Settings> Display & Brightness menu.

1.

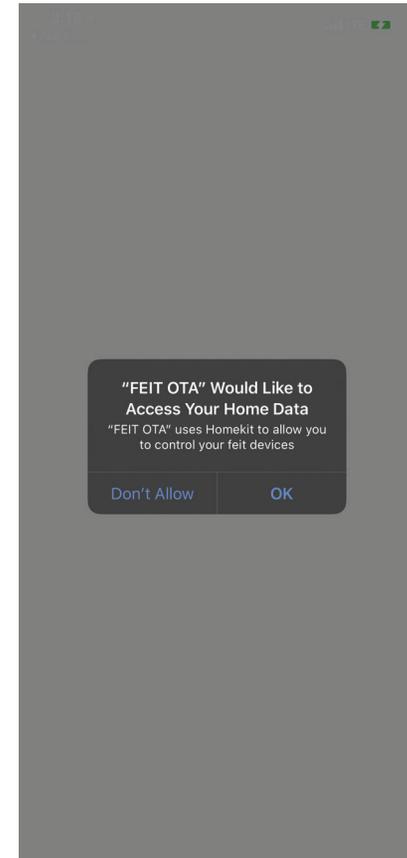

Open the App Store app.

2.

1. In the search field, type FEIT OTA.
2. Tap "GET" to install the FEIT OTA app.
3. Once installed, tap "OPEN" to launch the FEIT OTA app.

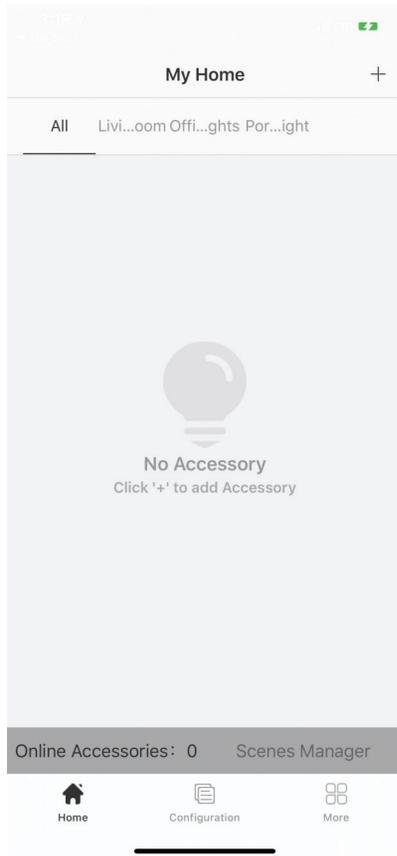

3.

Tap "OK" to allow.

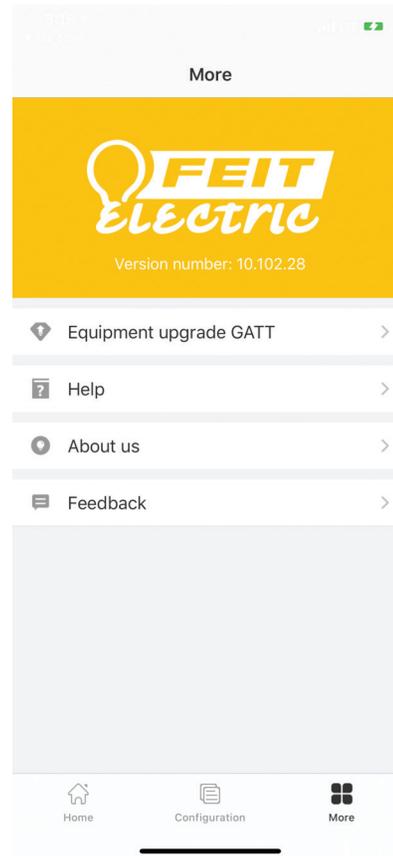

# Feit Electric HomeKit Bulbs Firmware Update for iOS 13.

4.

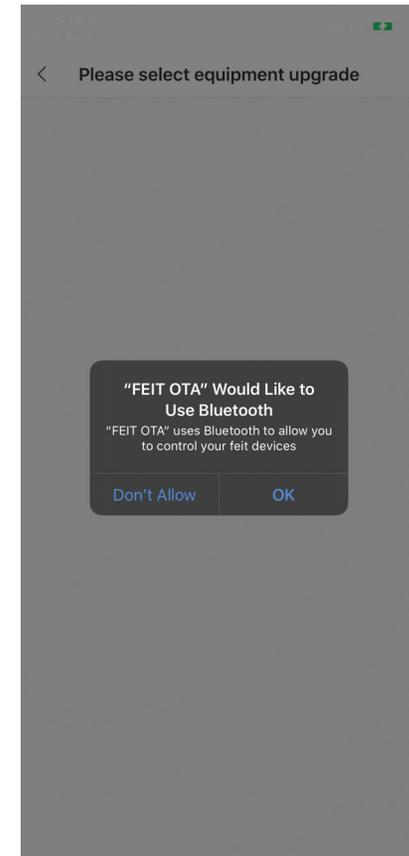

In the “My Home” screen tap on “More” at the bottom right corner.

5.

In the “More” screen tap on “Equipment upgrade GATT”.

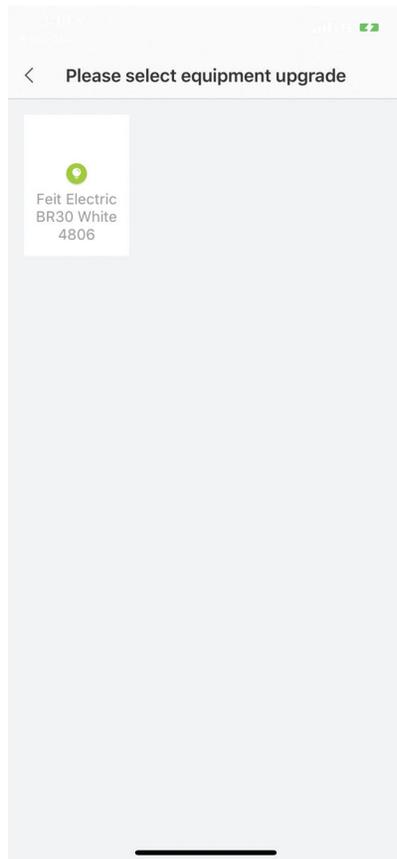

6.

Tap "OK" to allow.

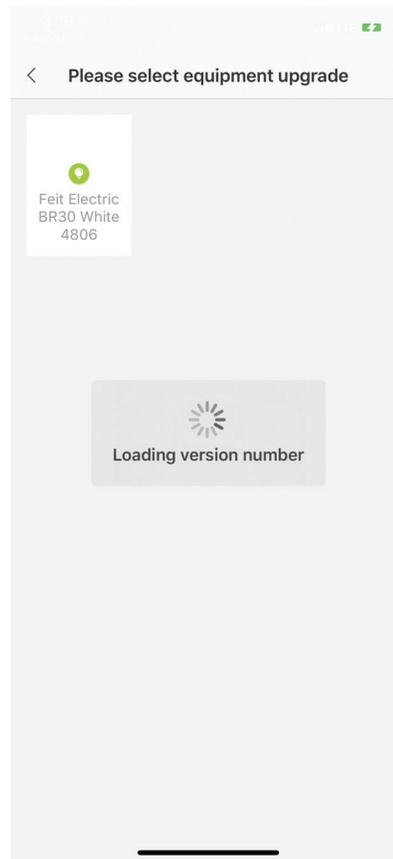

# Feit Electric HomeKit Bulbs Firmware Update for iOS 13.

7.

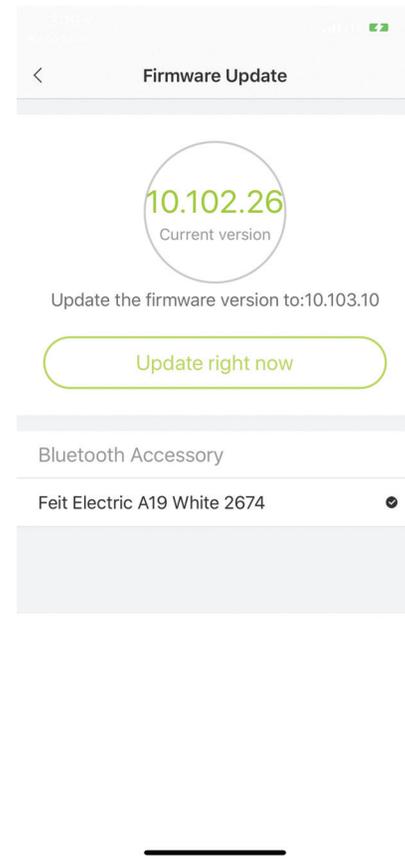

In the “Please select equipment upgrade” screen tap on the Feit Electric bulb you want to update. **Note:** You will need to update one bulb at a time.

8.

Wait for the firmware version number to load.

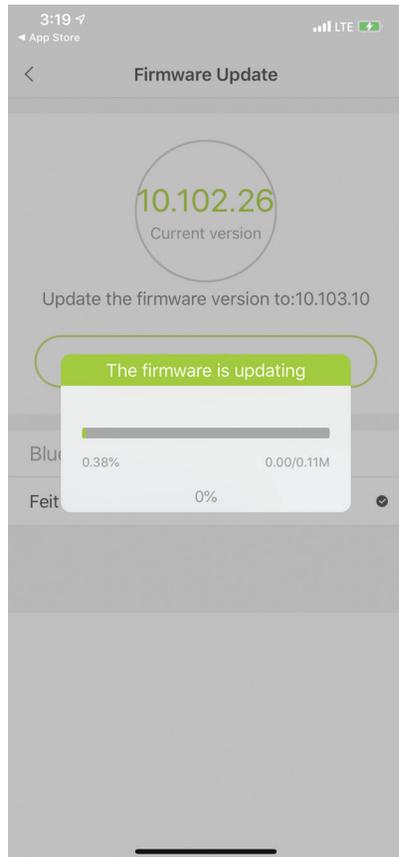

9.

In the “Firmware Update” screen tap on “Update right now”. **Note:** Do not leave or close the app while firmware is updating.

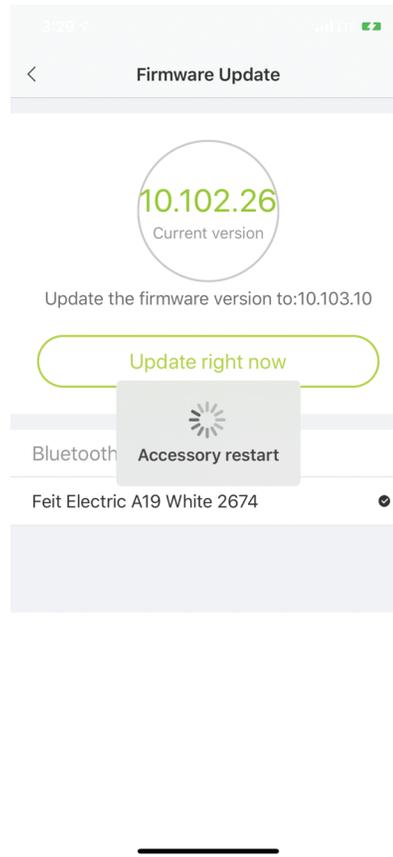

# Feit Electric HomeKit Bulbs Firmware Update for iOS 13.

10.

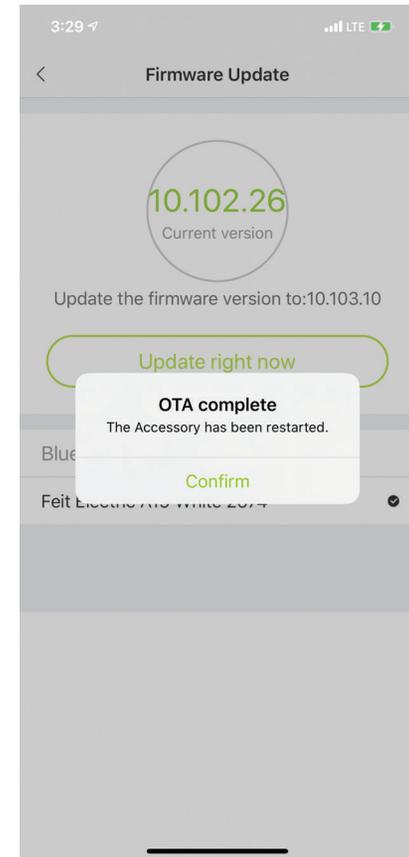

Wait for the firmware update to complete.

11.

Once the firmware update has completed, the accessory will restart.

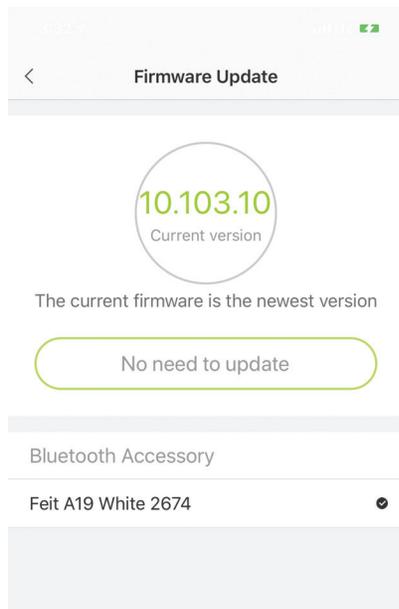

12.

After the accessory has been restarted, tap on "Confirm"

# Feit Electric HomeKit Bulbs Firmware Update for iOS 13.

13.

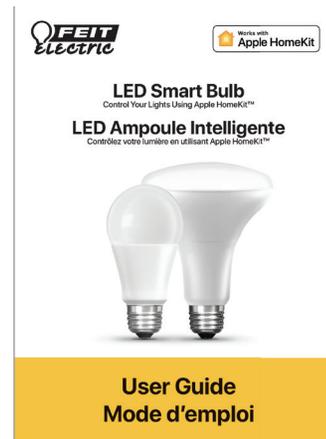

To confirm Firmware update was completed verify that current version states **10.103.10** in the circle.

Your Feit Electric HomeKit Bulb firmware is now updated.

14.

You can now move on to the steps in the Feit Electric HomeKit User Guide located in the box.
