

3.Use a tiny screw or nail to click the buto in the device, your garage door should

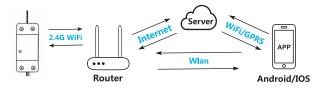

If this test fails, your device may not be compatible. For additional installation instructions and the list of compatible models, please visit our website and contact our support email.

Test OK! Click the button every time, the garage door will open or close.

Below are checklist before using the device:

- Your smart phone or tablet should have connected a 2.4G WiFi with internet.
- The device only supports 2.4G Wi-Fi. If you use a 5G router (it provides two Wi-Fi signals: 5G and 2.4G), please select the 2.4G WiFi to connect your smart phone.
- Download one of the APPs: "Tuya Smart" APP or "Smart Life" APP from APP Store or Google Play store.
- During pairing process,make sure that your IOS or Android device and the garage are within the range of your WiFi router.
- Make sure your router is MAC-open. If not, please cancel the router's MAC filtering setting first.

If it is hard to install with screws , you can also use the 3M gums to finish.

If you are worried about the steady, you can use both screws and 3M gums.

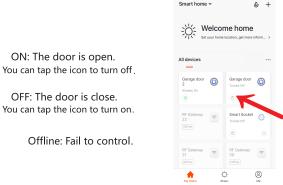

Add Device

ON: The door is open.

OFF: The door is close.

*The garage door will be activated when added successfully (when the blue LED stop blinking), so keep your door closed first.
