- **PROVIDES PRIVACY**
- **HIDES UNWANTED VIEWS**
- **ACCENTS THE ROOM**
- **APPLIES EASILY**
- **TRIM TO FIT OR ADD PANELS**

- 1. Measure area of application to ensure proper fit. Some areas may require the purchase of several kits. If necessary, trim the etched film for a custom fit.*
- 2. Thoroughly clean application area using alcohol or any Ammonia based window cleaner. Must be free of dirt and grease.*
- 3. Tape your graphic into desired position, the graphic must be flat. Firmly tape center of graphic.*
- 4. Un-tape one side of graphic and fold back over top of side taped to glass. Reveal corners and tape them down.*
- 5. Carefully remove paper backing; Cut backing off at center.*
- 6. Fold graphic back into position, pulling taut.*
- 7. Squeegee starting from center rubbing in an up and down motion.*
- 8. Remove remaining tape and repeat steps 4 thru 7.*
- 8. Carefully remove clear application tape at 180 degree angle. If graphic is lifting, lay application tape back down and re-rub.*
- 10. Cut door seams 1/8 inch back using razor blade if desired.*
- 11. Any remaining air bubbles smaller than 1/8 inch will dissipate within one week.*
