

Frequently Asked Questions

Can Finally light bulbs be disposed of in a landfill?

We meet all federal regulations for disposal in landfills. This means they will not affect ground water or air quality. Please consult your state for local requirements for mercury-containing products.

Are Finally light bulbs approved for use in enclosed fixtures?

Our 60 watt and 75 watt replacement light bulbs are approved for use in fully enclosed fixtures. Our 100 watt replacement light bulbs should not be used in this capacity.

Can Finally light bulbs be used outdoors?

Our Finally light bulbs can be used in outdoor fixtures as long as they are shielded from direct contact with rain or snow.

Do Finally light bulbs produce heat?

Our Finally light bulbs emit the same amount as an LED, a small fraction of the heat produced by an incandescent light bulb.

Does the Finally light bulb have a delay when turned on?

Finally light bulbs turn on instantly, but take a few seconds to come to full brightness.

Are Finally light bulbs dimmable?

No, but they will be in 2018.

Are Finally light bulbs ENERGY STAR certified?

No, but they will be in 2018.
