

SKU: 39411

Radiator Pressure Tester Kit

Specifications:

- For testing automotive pressurized cooling systems up to 30 PSI
- Includes 8 radiator cap adapters for servicing most domestic and import vehicles
- Large volume pump capacity reduces strokes required to pressurize cooling systems
- Self-locking quick-disconnect components
- Thumb-operated relief valve for convenient pressure release

Features:

- Helps find internal and external leaks in your cooling system.
- Features include a thumb-operated relief valve for quick and easy pressure release and self-locking quick-disconnecting components.
