CARE AND MAINTENANCE

TSFS-162G4436BN Set

Glacier Ice

Glacier Ice (if included) will protect sinks, faucets and shower doors from mineral buildup and hard water spots. This pre-soaked cloth will cover up to 40 sq. ft. and is reusable for multiple uses.

Glacier Ice Faucet and Sink professional sealer kit will not only restore sinks, faucets and shower doors from hard water spots and mineral buildup. It will also protect from future mold, mildew, corrosion and oxidation. Treats up to 100 sq. ft.

Ultimately, the best way to care and keep your product like new is to protect it with *Glacier Ice*. This nanotechnology will prevent any hard water spots, stains or oxidation on glass, faucets, drains, porcelain and stone. This eco-friendly sealant will seal your product, preventing any possible staining, mineral build-up or corrosion.

For everyday cleaning simply use a soft cloth or sponge, soap and warm water. Cleaning on a regular basis will help prevent the development of hard water deposits. We recommend all spills to be wiped up immediately. Do not allow surface deposits of water bi-products such as salt, calcium or detergent build up on the product as it will be difficult to clean.

For maintaining a great look, use *Glacier Ice* or another sealant once a year. Polished surfaces are less porous while unpolished surfaces are generally more porous, making them susceptible to mold, mildew and hard water build-up.

Caution: Do NOT use any acidic, ammonia, soft paste or abrasive cleaners. Also vinegar, lemon juice, steel wool or metal brushes should be avoided as this may cause damage to the finish.
