

CARE & MAINTENANCE

Wash the furniture and cushions (if applicable) with a solution of mild soap and water and allow to air dry completely.

Although this item is powder coated, steel is prone to rust over time. If rust is visible, lightly sand the affected area and apply touch-up paint.

For metal frames, apply a fine, clear automotive wax. This will protect the frames against UV exposure and salty air.

When the furniture is not being used, it should be covered. This will help extend the life of your furniture. Also, if possible, the furniture should be stored indoors during the cold, winter months.
