Extra-Duty While-In-Use Covers

One Cover Handles GFCI, Single, Duplex or Switch Configurations

Red Dot® Code Keeper® Extra-Duty While-in-Use Covers make it easier than ever to comply with National Electrical Code® (NEC) requirements for installing receptacles in wet locations. Preconfigured for GFCI — the industry's most common configuration — each cover ships with adapter plates to accommodate single or duplex receptacles and switches. Now, contractors can handle any application they encounter without needing dozens of different covers.

- Complies with NEC® Section 406.9 (B) (1) and 590.4 (D) (2) for Extra-Duty outlet box hoods - now required in wet locations
- Wide range of cover depths and receptacle configurations accommodates almost every common plug and cord size
- Key-hole mounts on back make installation fast and efficient (not available on CKLSVU)
- Combination box or device-mounting design provides flexibility in installation
- Durable latching covers prevent accidental equipment disconnects, reduce tampering and deter theft
- Lockable covers comply with OSHA lockout/tagout requirements
- Clearly visible UL® and CSA markings speed approval by inspectors
- Complies with NEC® Section 406.9 (B) (1) for unattended in-use plugs in wet locations
- Two adapter plates included with single-gang covers, four adapter plates included with two-gang covers

Accommodates Multiple Device Configurations* (device not included)

* Device not included

CKSUV
