

# window treatment terminology

## Panel

Panels cover the entire window, with a totally different look when tied back  $\frac{2}{3}$  of the distance from the top of the window.

## Valance

The perfect stand-alone top treatment. It can be teamed with a tier or swag pair for a complete window dressing.

## Cascade Insert Valance

This hangs from a drapery rod and the center "cascades" down over other components.

## Handkerchief Valance

A unique shaped valance. Its deep scallops hang in soft folds to create a charming "handkerchief" look.

## Festoon

For a beautiful formal look, top other components with a festoon.

## Tier

Tiers provide partial window coverage, and are often combined with a swag pair, valance or festoon for a complete look.

## Swag Pair

Install a swag pair to give your windows a unique silhouette.

## Fan Swag

Fan swags create an interesting gathered effect.

## Scarf

Very versatile, the scarf drapes over a rod and down each side of the window. If long enough, it may be puddled onto the floor.
