

Van Zyverden's
CANNAS PHAISON

As flamboyant as their tropical American ancestry, Cannas are among the most colorful summer bulbs with ruffled spikes tapering to refined buds, boasting immense, paddle shaped leaves. Their great reedy canes and palmy foliage make for large, magnificent plants, yielding blooms all summer long for long lasting curb appeal. They are deer resistant and appear most dramatic when grouped in masses. These are fast growers with large flowers.

talking and hummingbirds darting!*

About This Variety: Canna Phasion can eventually grow as tall as seven feet, making it one of the largest growing Cannas available, producing large, deep orange flowers in summer and fall. What makes them truly a stand out is their striking, multi-colored foliage. With leaves that are more beautiful than flowers, they start out green, bronze-purple with pink stripes that age to shades of pink and orange. Thought to be a mutation of Canna Wyoming, it is a quick multiplier and vigorous grower.

Growing Instructions: Where not hardy, plant outdoors in early summer, setting the rhizome in the hole, 'eyes' (shoots) up. Cannas do best with a good supply of water.

Care Tip: As flowers fade, deadhead to promote continued flowering. They like moist conditions.

Exposure: Full sun to partial shade

Height: Grows 84" tall

Spacing: Plant 12-18" apart, 2-4" deep

Hardy in: USDA zones 8-11

Guaranteed to grow 1 year from purchase if directions are followed. Any concerns related to quality and/or counts feel free to contact us.
