# KitchenAid® Grain Mill Attachment

KFE5T

## Exceptional Performance

### Grain Mill Attachment

Designed to mill low-moisture, non-oily grains such as wheat, corn, rye, oats, rice, buckwheat, barley and millet. The Grain Mill is not recommended for grinding peanuts or coffee beans.

### Twelve Grind Levels

The Grain Mill offers twelve different grind levels that range from a very coarse "cracked" texture to a fine grind.

### Grind Worm

The Grind Worm drives the grain-grinding action.

### Adjustment Knob

Large knob adjusts the fineness of the grind with confirming clicks for positive precision settings.

## Enduring Design

### Die-Cast Metal Construction

Tough and durable, the die-cast metal construction of the Grain Mill ensures many years of reliability.

### Easy to Clean

The Grain Mill does not necessarily need to be cleaned after every use, but should be brushed when changing types of grains. If needed, a toothpick may be used to clean the burr grooves. If the Grain Mill must be washed, it can be hand washed with mild detergent and warm water.

## Includes

### Cleaning Brush

The included cleaning brush is designed to clean the burr grooves and other mill parts after use.
