

Lite Blue

Ready Mix Joint Compound

Lite Blue

Let's get started on a great finish.

ProForm® BRAND Interior Finishing Products make it easier to achieve professional results.

Finishing drywall isn't difficult when you have the right tools and materials. When working with joint compounds, everyone has a preference based on weight, drying time, even how the material feels on the drywall knife. ProForm® BRAND offers a variety of products, so you can choose what works best for you on each job.

We want your drywall projects to go smoothly.

Success should never be a struggle. At National Gypsum, we develop products that are easy to use and perform to the highest standards. We created our ProForm® BRAND Lite Blue joint compound to help you get an easy, professional finish. So after you apply ProForm® BRAND Lite Blue and your final skim coat, you'll have a smooth and consistent surface, ready for priming and painting.

Features

-  Specially formulated, vinyl base ready mix
-  Approximately 30% lighter than standard weight ready mix
-  Smooth, creamy and easy to spread
-  Less pocking and easier sanding
-  Reduces shrinkage up to 33%
-  Ready to use right from container after mixing
