Use and Care Guide
Clay Fire Pit

Package Contents
A. Mesh Lid
B. Metal Grate (Inside Clay Body)
C. Clay Body
D. Metal Stand

Preparation
Before beginning, make sure all parts are present. Compare parts with package contents list and diagram in this page. If any part is missing or damaged, do not attempt to use the product. Contact Customer Service.

Assembly
1. Find a level flat surface on which to set your fire pit. Place clay body (C) in the metal base (D) so that the ridge along the bottom diameter of the body rests on the top of the base. Then place metal grates (B) inside clay body (C).

2. Place the lid (A) on top of body (C). Build a small fire with a couple pieces of kindling. Do this for the first two or three fires. Let fires burn out naturally.

Safety Information
Before lighting your fire pit, read, and understand all instructions in this manual.

- **WARNING:** Read this manual carefully and completely before using your fire pit to reduce the risk of fire, burn hazard, or other injury.
- **WARNING:** For outdoor use only.
- **WARNING:** You must follow the information in this manual exactly. If not, a fire may result, causing property damage, personal injury, or loss of life.
- **WARNING:** Do not store gasoline or other flammable vapors and liquids in the vicinity of this fire pit.
- **WARNING:** Do not use lighter fluid, gasoline, kerosene or any other combustible material.
- **WARNING:** Use heavy duty gloves when handling/tending your fire pit.
- **WARNING:** Never leave your fire pit unattended until it is completely out.
- **WARNING:** Do not leave children alone or unattended in an area where the fire pit is being used. Never allow children to sit on, stand, or play around the fire pit while hot. This also applies to pets.

For Best Results and to Avoid Cracking
- Do not use your fire pit when wet, ONLY when dry.
- Do not use sand, silica sand, or soil in the base of the fire pit or any material that will retain moisture. The use of a metal grill is recommended.
- Do not allow the fire pit to be watered by sprinklers.
- Start a small fire slowly to allow time for the clay to expand and to avoid cracking. Continue to build your fire when the clay heats up. This process can take 15-20 minutes.
- Large fires will crack your fire pit.
- Store your fire pit indoors out of freezing temperatures.
- Position your fire pit on a solid level surface to avoid tipping.
- Do not fire your fire pit on wooden decks.
- Do not put the fire out with water. THIS WILL CRACK YOUR FIRE PIT.
