RE: MSDS on Aluminum & Steel Gutters, Downspouts, Flashing, Drip Edges, Soffit/Fascia, and other Similar Metal Products

To Whom it may Concern:

The standard in (b) (6) (iv) states "This section does not apply to "Articles". In (c), the standard follows that: "Article" means a manufactured item: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function (s) dependent in whole or in part upon its shape or design during end use; and (iii) which does not release, or otherwise result in exposure to, a hazardous chemical under normal conditions of use."

It is Amerimax Home Products' opinion that our aluminum and steel gutters, downspouts, flashing, drip edges, soffit/fascia, and other similar metal rain carrying products would be considered articles by this definition and, as such, would not require a MSDS.

Sincerely,

AMERIMAX HOME PRODUCTS, INC.
