

Greenland Gardener™

4 BOARD SET-UP KIT

INSTRUCTIONS

1. Pick a level location that will get a lot of sunshine. Lay weed fabric or newspaper on the ground to keep weeds from growing.

2. Unpack your Greenland Gardener™ kit. Lay the boards and corners out where you want to build your garden.

KIT CONTAINS:

4 - planks

4 - corners

3. Connect 1 board to 1 connector, sliding the board into connector suggested to put grooved side in. Repeat to completion.

4. Fill bed with dirt and use rake to level off soil.

5. Make hole and start planting. Cover hole with dirt and gently water thoroughly.

Gardening Tips:

Sow directly in garden when danger of frost passed. If you start your seeds in cool weather be sure to watch the weather and cover your garden with cover of plastic or blanket at night. Soil must be kept moist during germination, do not let the soil dry out. Also in heavy rains cover beds if seed were just planted to avoid washing them away from the hole.
