

NEW Formula!

Septic Safe Cleaner and System Enhancer

Introducing Oxy-Flush™ from Aero-Stream®

Oxy-Flush is an oxygen based cleaner and septic system enhancer. It is designed to be used in all water using appliances and fixtures in the home. The powerful cleaners remove dirt and grime build up in dishwashers, laundry washers, toilets, sinks, drains, etc. As it flows through drains and waste plumbing it continues to scour build up and debris. Without the debris and build-up odors are also eliminated.

Unlike most cleaners that add harsh chemicals to the septic system after they perform their work, Oxy-Flush adds life giving oxygen to the septic system. This oxygen promotes the very active and healthy aerobic bacteria that devours waste, enhancing the function of the septic system. While designed specifically to address homes connected to septic systems, it works equally well in all homes, apartments, retail and commercial properties to keep the waste plumbing clean and functioning properly.

Use on:

- Toilets
- Laundry Washer
- Dishwashers
- Bathtubs
- Showers
- Sink Drains
- Floor Drains

Use with the Septic System Saver® for the most effective system performance. Prolong the life of your septic system!
