

PR-D17

**AM / FM-RDS Portable Radio
Specially Designed for the Vision Impaired
with Helpful Guided Voice Prompts**

Color

BLACK

The PR-D17 was designed with special consideration for the vision impaired. Practical voice prompts and high contrast large yellow rotary tuning and volume control knobs and preset buttons with raised symbols to aid in identification have been added which makes operating the PR-D17 simple and intuitive. Each button press is followed by an audio prompt to help guide the user through actions such as station browsing, setting the alarm clock, radio station information, time and settings.

With a growing and aging population the PR-D17 is a necessary item for the Radio enthusiast who is blind or vision impaired.

Large and easy to read Backlit LCD display that highlights RDS information, reception, frequency strength, battery and alarm symbols.

Built-in 200mm AM Ferrite Antenna bar allows for best AM reception along with an external adjustable FM telescopic antenna.
