CLEANING

DO NOT use bleach or fabric softeners.

Cushions are all-weather and will repel water and moisture, however, they are not completely water resistant and long periods of exposure to rain and sun can wear on the cushions so we recommend storing them indoors or covering them to prolong the beauty.

TIPS

Storing your patio furniture in a cool and dry place during the winter months or when it will not be used for extended periods of time is recommended. Limiting your furniture's exposure to the elements will prolong its lifespan.
