RECOMMENDED LOCATIONS FOR SMOKE ALARMS

How to Install Smoke Alarms

Boundary walls and ceilings, stairways, hallways, or porches. Using this Smoke Alarm in common areas may not be a substitute for complete fire detection systems in places like lobbies, dormitories, dormitories, hospitals, health care facilities, nursing homes, day care facilities, or group homes of any kind. It is not a substitute for property or life insurance. It is not a substitute for common areas like lobbies, dormitories, dormitories, day care facilities, or group homes of any kind. It is not a substitute for common areas like lobbies, dormitories, dormitories, day care facilities, or group homes of any kind.

If you are unsure, please consult with the manufacturer to determine their response to the sound of the smoke alarm while testing the smoke alarm.

Smoke Alarms have played a key role in reducing deaths resulting from home fires, and they are recommended for all homes and many types of non-residential facilities. Smoke Alarms should be placed between 4 and 12 inches (102 and 305 mm) from the ceiling or wall, and at least 4 inches (102 mm) from the wall or ceiling trim. Smoke Alarms should be installed in the kitchen, bathroom, laundry area, and near sleeping areas. Special purpose Smoke Alarms are available for people with hearing impairments or visual impairments.

LIMITATIONS OF SMOKE ALARMS

Smoke Alarms in these areas:

More specifically, install Smoke Alarms:

1. In hallway, stairwell, and near stairway.
2. In hallways, storage rooms, and unfinished basements.
3. In bedrooms, stairways and near stairway.
4. In hallways, finished basements, and unfinished basements.

In order to determine their response to the sound of a smoke alarm, people with hearing impairments or visual impairments should consult with the manufacturer to determine their response to the sound of a smoke alarm. They are not foolproof.

Smoke Alarms are not to be used as detectors unless the conditions in the area are such that they will not be affected by smoke from a fire.

If you are unsure, please consult with the manufacturer to determine their response to the sound of the smoke alarm while testing the smoke alarm.
