

Grower's Phalaenopsis
Orchid in 4 in plastic pot

- **Container:** Phalaenopsis will come in a plastic grower's pot. Decorative Pot is not included.
- **Lighting:** bright light is best
- **Water:** Weekly watering will be required. It is best to drench once a week. Be sure to allow water to drain out completely. Avoid standing water. Select a day of the week and always water on that same day to prevent over watering.
- **Temperature:** If you live in a place where the weather changes to temperatures below 50 degrees Fahrenheit, do not leave the plant outside. You will need to bring the plant inside to prevent cold exposure during temperatures below 50 degrees Fahrenheit. Ideal climate is 59-79 degrees Fahrenheit.
- **Fertilizer:** Water Soluble 20-10-20 is best
