## REACH 'n SPRAY®

### LONG REACH AEROSOL CAN SPRAYER

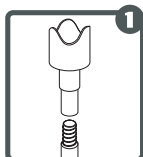

#### ABOUT AEROSOL CANS

Spectracide™ Reach 'n Spray® Long Reach Aerosol Can Sprayer helps you spray aerosols in hard-to-reach places, improving safety by keeping you off ladders and away from hazards.

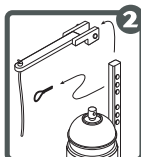

- 1 If pressed off center, aerosol buttons may twist off their plastic tubes. The Spectracide Reach 'n Spray Long Reach Aerosol Can Sprayer actuating arm adjusts for height in order to push the button straight down the centerline.
- 2 Spectracide Reach 'n Spray Long Reach Aerosol Can Sprayer is packaged with a sizing sleeve in the can holder. The sleeve snugly centers narrower cans so the arm will be centered on the button. Remove it for larger cans.
- 3 The Spectracide Reach 'n Spray Long Reach Aerosol Can Sprayer plunger will reach down to actuate the finger-shaped, recessed pads.
- 4 Light, short tugs on the lanyard will apply aerosol accurately and prevent drips from excess spray.

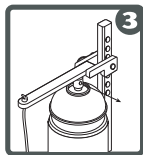

#### ASSEMBLY AND USE

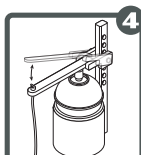

Screw pole into base of can holder.

Remove forked actuating arm and put an aerosol can into holder. For fatter cans, remove the sizing cylinder first.

Point spray nozzle to side of can holder.

Replace actuating arm at height to put plunger flat on aerosol button or pad. Spectracide Reach 'n Spray Long Reach Aerosol Can Sprayer is ready to use.

#### SAFETY:

**ELECTRICAL SAFETY:** Never use an extension pole, even fiberglass, near electrical lines or during storms.

**EYE SAFETY:** Aerosol sprays produce a fine mist. Wear eye protection and stand upwind of spray.

**CLOTHING PROTECTION:** Excessive spraying of paint or pruning sealer causes drips. Wear gardening gloves.

**FALLS:** Always stand on a level, stable surface. Standing on a ladder while using an extension tool can lead to a fall.

**PRODUCT LABELS:** Always read and follow label directions when using this product with other products.
