Small Female PCA® Aerator
1 pack - Online SKU 206592480

Meets California kitchen and residential bathroom requirements.

Stream type and flow:

Choose the right one for your needs

Aerated streams introduce air into the water stream to produce a larger white stream, soft to the touch and non-splashing. Aerated streams are the usual choice for residential faucet.

Laminar stream straighteners produce a crystal clear and non-splashing stream (no mix water/air).

A **Spray** device is used to produce a miniature shower pattern to provide full coverage of the hands during washing when the water pressure is too low to produce an aerated or laminar stream. Recommended for use in bathroom.

Faucet Aerator Gender:

The right faucet aerator for the right fit.

Female Spout

Male Aerator

Male Spout

Female Aerator

- Male housing fits faucets with inside threads.
- Female housings fits faucet with outside threads.

Tip:

Dual thread housings fit regular size faucets with inside or outside threads.

Meets California kitchen and residential bathroom requirements.

 <p>In addition to flow restricted aerators, NEOPERL also offers a pressure compensating (PCA®) faucet aerator that maintains a constant and comfortable water flow, for use in the kitchen or bathroom.</p>	 <p>NEOPERL's SLC® is the only faucet aerator with a silicone tip to eliminate lime and scale build up. Simply rub the bottom of the aerator with the tip of your finger.</p>	 <p>With NEOPERL's SSR faucet aerators, you can easily adjust the stream direction and eliminate splashing from the curvature of the sink.</p>	 <p>The PCA® Auto Clean, accumulates the sediments in the dome screen until the faucet is shut off. The sediments will be flushed within the first few seconds after the faucet is turned on.</p>

1.5 gpm meets California kitchen requirements and

Instructions

Insert installation:

1. Unthread old aerator from faucet and remove washer and insert.
2. Place new aerator insert into the original housing.
3. For housings with inside threads, use thinner washer. For housings with outside threads, use thicker washer.
4. Install onto spout by hand. If leak occurs, tighten more firmly.

Male or Female installation:

1. Unthread old aerator from faucet.
2. Install onto spout by hand. If leak occurs, tighten more firmly.

Dual thread installation:

1. Unthread old aerator from faucet.
2. For housings with inside threads, use thinner washer. For housings with outside threads, use thicker washer.
3. Install onto spout by hand. If leak occurs, tighten more firmly.

Shower Flow Controller installation:

1. Remove showerhead.
2. Apply plumber's tape to threads.
3. Install adapter onto spout by hand. Reconnect showerhead.
4. Turn on shower. If leak occurs, tighten more firmly.

Installation instructions for dual thread adapters and fittings:

1. Remove aerator from faucet. If a wrench is necessary, place cloth over aerator to prevent damage.
2. Remove any old washers that might be caught inside the spout.
3. Clean the threads on faucet.
4. For faucets with outside threads, remove thicker washer. For faucets with inside threads, leave thicker washer in place. Install adapter onto spout by hand.
5. Connect appliance with relevant threads.
6. Turn on faucet. If leak occurs, tighten more firmly.

Installation instructions for male or female adapters:

1. Remove old aerator from faucet. Use wrench if necessary.
2. Remove any old washers that might be caught inside the spout.
3. Clean the threads on faucet for easier installation.
4. Install onto spout by hand.
5. Connect appliance with relevant threads.
6. Turn on faucet. If leak occurs, tighten more firmly.
