

FLEX-A-FILL Professional Grade[™], from Crafco®, Inc. is a hot-applied polymer modified asphalt sealant used to seal cracks in streets, driveways, and commercial parking lots. FLEX-A-FILL Professional Grade can be used in Direct Fire and Oil Jacketed equipment. It resists cracking in the winter and is highly resistant to tracking or pick-up by vehicle tires at warm summer temperatures. Tested to the specifications properties of ASTM 6690. FLEX-A-FILL Professional Grade has been the choice of contractors and agencies for over 40 years. This sealant is Professional Grade for commercial use only.

FLEX-A-FILL Professional Grade highlights:
