Use & Care Guide

Directions: Scrape off build-up and sweep area. Liberally apply covering the entire stained area. Scrub the surface then add a small amount of water and continue to scrub. Rinse the area with water and, if available, rinse with high pressure water. For stubborn stains, additional applications may be necessary. Allow surface to dry before applying additional applications. Do not allow cleaning solution to dry while using. When using on asphalt, a long dwell time is not recommended because of the oil content in asphalt. Please note: Use when surface and air temperatures are 50°F or above as the product may take longer to remove stains in cooler temperatures. Do not use on painted surfaces, rubber, plastic, clothing or textiles. CAUTION: Avoid contact with eyes and prolonged or repeated contact with skin. Use with adequate ventilation. FIRST AID MEASURES: If swallowed, do not induce vomiting. Call physician or Poison Center immediately. In case of eye contact, flush with water for 15 minutes. KEEP OUT OF REACH OF CHILDREN.
