PACKAGE CONTENTS

1 x True HEPA Air Purifier
1 x Activated Carbon Filter (Pre-installed)
1 x Preliminary/HEPA Combination Filter (Pre-installed)
1 x User Manual

SPECIFICATIONS

Power Supply	AC 120V / 60Hz
Rated Power	40W
Effective Range	≤ 300 ft ² (≤ 30 m ²)
Operating Conditions	Temperature: 14°F~104°F (-10°C~40°C)
Noise Level	≤ 52dB
Clean Air Delivery Rate (CADR)	135 CFM (230 m ³ /h)
Standby Power	< 0.8W

SAFETY INFORMATION

IMPORTANT: Please read and comply with all of the instructions and warnings provided in this manual before using the product. Failure to comply with the instructions and warnings provided herein may result in inaccurate results and/or damage to the product itself.

General Safety

Only use this air purifier as described in this manual.

- Ensure the plug fits properly into a polarized power outlet.
- When not being used, turn the air purifier off and disconnect it from its power source by removing the plug from the electrical outlet.
- **DO NOT** operate the unit if cord or plug is damaged. Doing so may result in damage to the unit or injury.
- **DO NOT** handle the unit with wet hands. Thoroughly dry your hands before handling any part of the air purifier.
- **DO NOT** immerse air purifier in water or liquids. Doing so may result in damage to the appliance, electric shock, or fire.
- **DO NOT** use the air purifier in wet or humid environments.
- **DO NOT** use the air purifier outdoors. This appliance is designed for indoor use only.
- **DO NOT** use the purifier in a room with major indoor temperature changes as this may cause condensation to build up inside the appliance.
- **DO NOT** use the air purifier in an enclosed space where flammable, combustible or explosive gases are present.
- **DO NOT** use in an area where toxic vapors, flammable dust or oxygen tanks are present.
- **DO NOT** insert fingers or objects into the air outlet.
- Child supervision is required while the air purifier is on. Do not allow children to play on or near the air purifier.

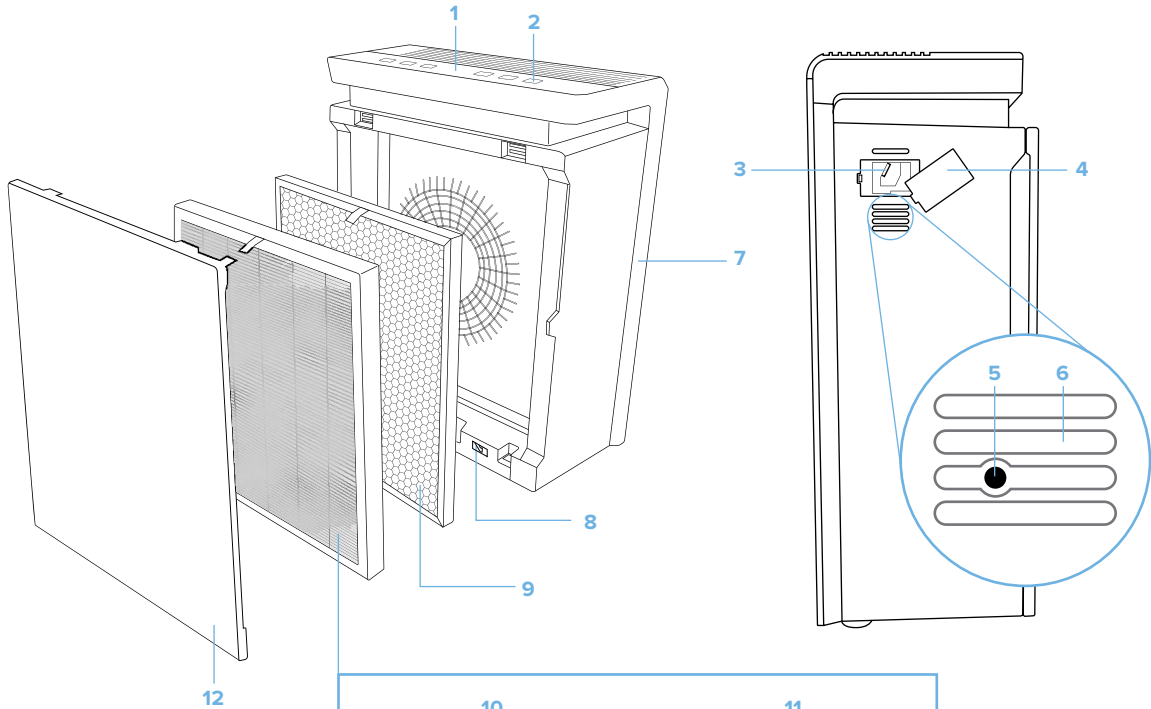

Use & Care

- Always make sure to place the air purifier on a flat, level surface before operation.
- Always allow 15 inches (38 cm) of clearance on all sides of the purifier.
- Place the air purifier so that the power cord easily reaches a standard electrical outlet for a polarized plug.
- **DO NOT** run the power cord under carpeting. Do not cover cord with throw rugs, runners or similar coverings. **DO NOT ROUTE CORD UNDER FURNITURE OR APPLIANCES.** Place the power cord away from high-traffic areas.
- This product is suitable for use with solid-state speed controls.
- **DO NOT** use an extension cord with this unit.
- Never place the unit on soft surfaces such as a bed or sofa.
- This air purifier should not be used as a substitute for kitchen or bathroom ventilation or vacuum cleaning.
- **DO NOT** sit on or place anything on top of the purifier.
- **DO NOT** place the purifier directly below an air conditioner to prevent any moisture from getting into the purifier.
- **DO NOT** place the air purifier near sources of heat, such as stove tops, ovens, radiators or computers.
- **DO NOT** place open flames, including candles, directly in front of the air purifier.
- **DO NOT** use this appliance with indoor smoke-type insect repellents or in places with oily residues, burning incense or chemical fumes.
- Always unplug the appliance from the power supply before servicing.

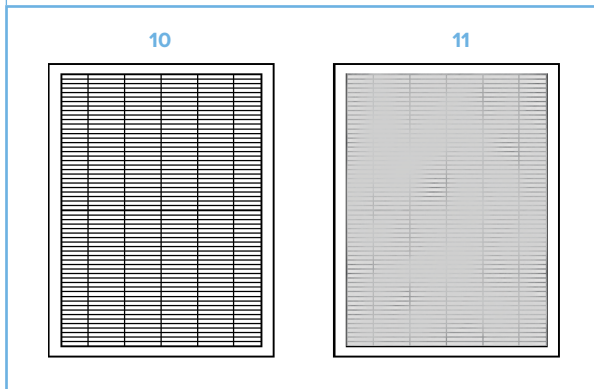

- This unit should be inspected frequently. Dirt that has collected should be removed regularly to prevent excessive accumulation that may result in flashover or fire.
- **DO NOT** remove the back cover while the air purifier is on. Doing so will automatically turn off the unit.
- **DO NOT** clean the appliance with water or any other liquid to avoid electric shock, or injury.
- Only use Levoit LV-PUR131-RF replacement filters for this unit. Do not attempt to use other filters with this appliance.
- If you experience any problems while operating the air purifier, refer to the **Troubleshooting** section on page 15. If you are still having problems with your air purifier, contact Customer Support on page 18.
- If the unit is damaged or is not functioning properly, immediately discontinue use and contact Customer Support (page 18).
- **DO NOT** attempt to repair this device in any way or use any replacement components or parts to modify the air purifier. Doing so will void your warranty. Contact Customer Support immediately if your appliance is no longer working.

GETTING TO KNOW YOUR AIR PURIFIER

1. LED Display
2. Touch-control Panel
3. Dust Sensor
4. Dust Sensor Cover
5. Reset Button
6. Reset Button Vent
7. Housing
8. Safety Switch
9. Activated Carbon Filter
10. HEPA Filter
11. Fine Preliminary Filter
12. Back Cover

LED DISPLAY

1. Power Symbol
2. Change Filter Indicator
3. Timer
4. Air Quality Indicator (Auto Mode only)
5. Auto Mode
6. Sleep Mode
7. Fan Speed

GETTING STARTED

1. Open the back cover of the air purifier and remove both filters from their plastic packaging [Figure 1.1].
2. Reinstall the filters, first with the activated carbon filter (black) followed by the HEPA filter (white). Make sure the pull tabs on both filters are facing outward. [Figure 1.2]
3. Replace the back cover by aligning the bottom portion of the cover with the inlets on the bottom of the housing. Make sure that the piece at the bottom of the cover comes into contact with safety switch. [Figure 1.3]

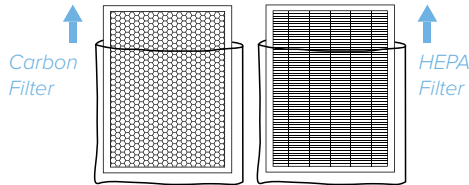

Figure 1.1

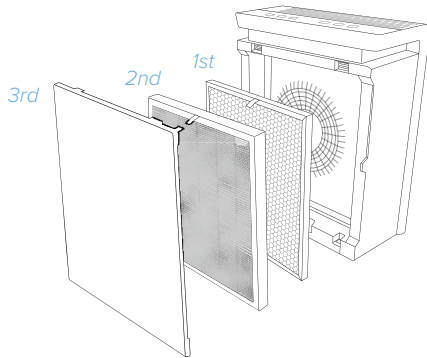

Figure 1.2

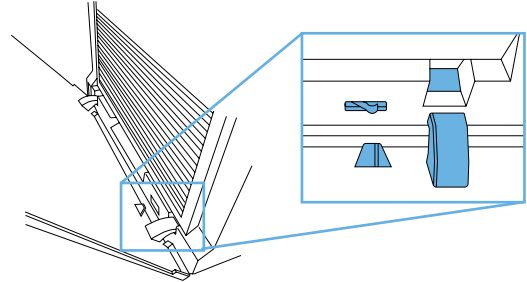

Figure 1.3

4. Slowly close the cover by aligning the top portion of the back cover with the inlets at the top of the opening. [Figure 1.4]

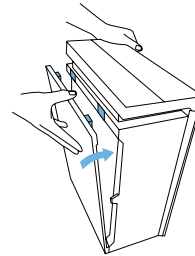

Figure 1.4

OPERATION

General Operation

1. Place the air purifier on a level surface.
2. Plug the air purifier into a powered electrical outlet.
3. Tap '⏻' to turn on the air purifier. It will start operating at low speed.
4. (Optional): Tap '🌀' to increase the fan speed of the air purifier. There are three fan speeds to choose from (see **Button Controls**).
5. Tap '⏻' to turn off the air purifier when you are finished using it.

Button Controls

Power Button

Turns on or turns off the air purifier.

Display Button

Turns on or turns off the LED display while the air purifier is operating.

NOTE: While the display is off, you can tap any button (except for '⏻') to turn on the display.

Sleep Mode Button

Tap '🌙' to turn on or turn off the Sleep Mode function, which is the lowest speed setting, to create a quiet environment while producing clean air.

NOTE:

- Sleep Mode is the lowest fan speed.
- You can also tap '🌀' or '🌀' to exit out of Sleep Mode.

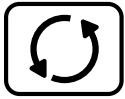

Fan Speed Button

Tap '🌀' to cycle through the unit's fan speeds: low, medium and high.

NOTE:

- The fan speed cannot be adjusted while on Auto Mode or Sleep Mode.
- To effectively clean the air, make sure to keep windows closed while the air purifier is operating. Open the windows regularly to maintain proper air circulation throughout your home.
- For best results, it is recommended to run the air purifier at maximum speed for 15–20 minutes before using a lower speed setting or setting the purifier to Auto Mode.

OPERATION (cont.)

Auto Button

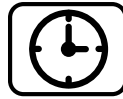

Turns on or turns off the automatic sensor inside the air purifier. This automatic mode (Auto Mode) adjusts the fan speed of the air purifier according to the current air quality to provide clean air for your living space. The air quality indicator will also illuminate on the LED display. The table below shows the different colors of the air quality indicator in correlation to both air quality & fan speed. [Chart A]

Chart A

Color	Air Quality	Fan Speed
Red	Bad	High
Yellow	Moderate	Medium
Green	Good	Low
Blue	Very Good	Sleep Mode

NOTE:

- It will take 1 minute for the dust sensor to detect the air quality each time Auto Mode is turned on. After 1 minute, the color of the air quality indicator will change based on the detected air quality.
- You can also tap '⊞' or '⏸' to turn off the automatic sensor.

Timer Button

Allows you to program a timer anywhere from 1 to 12 hours.

1. Tap '⏸' repeatedly to choose a time.
2. Once you have reached the desired time, the display will flash three times before setting.
3. The air purifier will automatically power off once the timer has finished counting down.
4. To cancel the timer, tap '⏸' repeatedly until the display reads "--:--". Wait until "--:--" flashes three times.

Memory Function

The air purifier will remember its programmed settings when turned off, and will resume these settings when it is turned back on. Please note that the air purifier must remain plugged in for this memory function to work.

KEEPING THINGS CLEAN

Checking the Air Filters

When the change filter icon lights up, this is simply a reminder to **check** the air filters. The icon turns on sooner or later depending on how often you use your air purifier. It does **not** necessarily mean it is time to change the filters.

If the change filter indicator has turned on, please remember to reset the air purifier after checking the filters by pressing the black reset button inside the vent on the side of the air purifier (See **Resetting the Air Purifier** see page 13).

When Should I Replace the Air Filters?

It is recommended to change the air filters every 6–8 months. However, you may need to change your filters sooner or later depending on how often you use your air purifier. It is important to watch out for the following signs of expired filters:

- Increased operating noise
- Decreased airflow
- Clogged filters
- Increased presence of odors

NOTE:

- *The environment in which the air purifier being used may also extend or shorten the lifetime of the the air filters. Using your air purifier in an environment of relatively high pollution may mean you will need to change the air filters more often.*
- *If the air pollution in your environment is very high, there is a possibility that the filters may not be completely effective and may need to be replaced before the indicator appears on the display.*
- *Remember to reset the air purifier after changing the air filters.*

Replacing the Air Filters

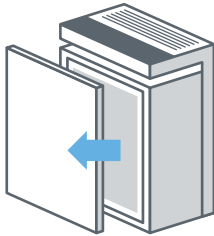

Figure 2.1

1. Unplug the air purifier and remove the back cover. [Figure 2.1]

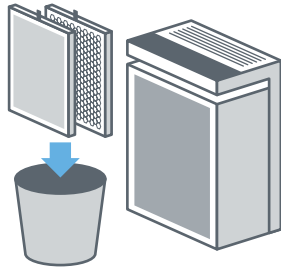

Figure 2.2

2. Remove the old air filters and properly dispose of them. [Figure 2.2]

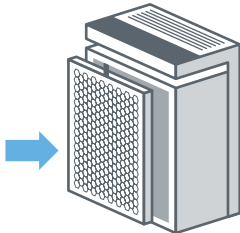

Figure 2.3

3. Unwrap the new air filters. Place the Activated Carbon filter inside the housing first, making sure the pull tabs are facing out. [Figure 2.3]

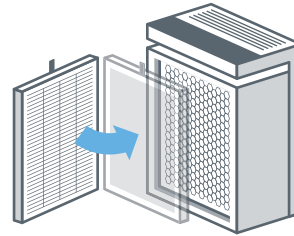

Figure 2.4

4. Install the True HEPA filter into the housing. Making sure the pull tabs are facing out. [Figure 2.4]

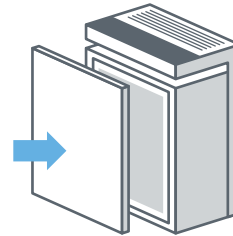

Figure 2.5

5. Replace the back cover onto the housing. [Figure 2.5]

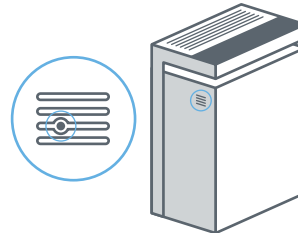

Figure 2.6

6. Press the button inside the reset button vent (see **Resetting the Air Purifier** on page 13). [Figure 2.6]

NOTE:

- The filters cannot be cleaned manually.
- The back cover must be placed back on the unit in order for it to power on.
- Only use **Levoit LV-PUR131-RF True HEPA Filters** when changing the filters for this device.
- Scan the QR code to the right to purchase new air filters.

Resetting the Air Purifier

It is necessary to reset the air purifier after changing the air filters.

1. Plug in the air purifier and turn it on.
2. Locate the reset button vent on the side of the air purifier. [Figure 3.1]
3. Use a pen, pencil, or a small object to press the black reset button inside the vent. [Figure 3.2]
4. The change filter indicator will disappear, indicating that the reset is complete.

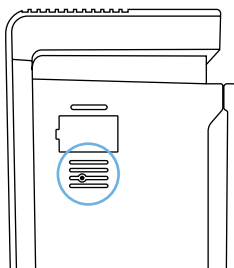

Figure 3.1

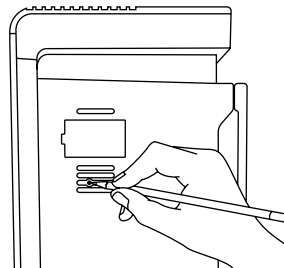

Figure 3.2

NOTE: When using the air purifier in a heavily polluted environment, the lifetime of the air filters may be significantly reduced and the filters may stop filtering air properly. You can change the filters even if the change filter indicator does not light up. Follow the steps in the **Replacing the Air Filters** section, then reset the air purifier.

Cleaning the Dust Sensor

1. Turn off and unplug the air purifier.
2. Open the dust sensor cover. [Figure 4.1]
3. Use a cotton swab, dipped in clean water, to clean the lens. [Figure 4.2]
4. Wipe the lens dry with a dry, clean cotton swab.

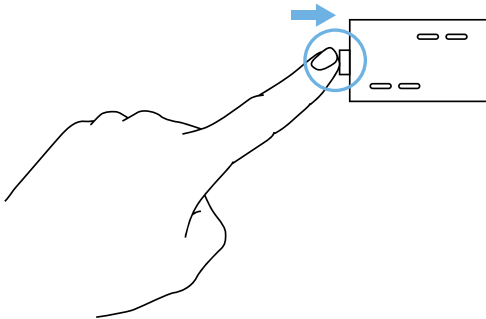

Figure 4.1

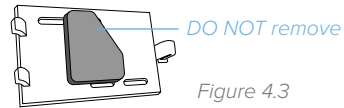

Figure 4.3

NOTE: DO NOT remove the foam piece attached to the dust sensor cover. [Figure 4.3]

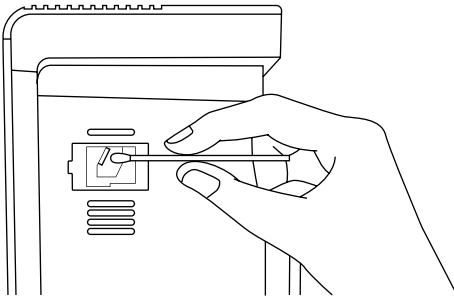

Figure 4.2

TROUBLESHOOTING

Problem	Cause	Solution
Air purifier does not power on.	Unit is not plugged into an electrical outlet.	Connect the plug to a powered electrical outlet.
	Outlet is not working properly.	Try plugging the air purifier into a different outlet.
	Back cover not properly placed on the unit.	Properly replace the back cover as noted in the Getting Started section on page 8.
	Power cord is damaged.	Immediately discontinue use and contact Customer Support (page 18).
	Air purifier is defective or malfunctioning.	
Air purifier does not respond to button controls.	Air purifier is not plugged into an outlet.	Connect the plug to a powered electrical outlet.
	Back cover not properly placed on the unit.	Properly replace the back cover as noted in the Getting Started section on page 8.
	Air purifier is defective or malfunctioning.	Immediately discontinue use and contact Customer Support (page 18).
Why does the air quality indicator only stay at one color after activating Auto Mode?	There has been no significant change in air quality.	Allow the air purifier to continue running.
	Auto Mode has just been turned on.	Allow the air purifier to run for one minute. After one minute, the color of the air quality indicator will change based on the detected air quality.
	Unit is defective or malfunctioning.	Immediately discontinue use and contact Customer Support (page 18).
The air quality indicator always stays red, and the unit is running on high speed.	The dust sensor may need to be cleaned.	Clean the dust sensor as mentioned in the Cleaning the Dust Sensor section (page 14).
Air purifier makes an unusual noise while operating.	Air filters are dirty.	Replace the air filters as instructed in the Replacing the Air Filters section on page 12.
	Filter does not fit properly.	Properly place filter(s) as noted in the Getting Started and Replacing the Air Filters sections (pages 8 and 12).
	Foreign object inside the unit.	Immediately discontinue use and contact Customer Support (page 18). DO NOT attempt to open the air purifier.

TROUBLESHOOTING (cont.)

Problem	Cause	Solution
Significantly reduced airflow.	Filter packaging has not been removed.	Remove filter from packaging before use.
	Fan speed is low.	Press '  ' to adjust fan speed.
	Filter needs to be replaced.	Replace the air filters as instructed in the Replacing the Air Filters section on page 12.
	Not enough clearance on all sides of the purifier.	Ensure there is at least 15 inches (38 cm) of clearance on all sides of the purifier.
Poor air purification quality.	Room is too large for the air purifier's applicable area.	Ensure the room is smaller than 300 ft ² (30 m ²).
	Air inlet or outlet is blocked.	Remove objects blocking air inlet or outlet.
	Filter(s) not properly placed in housing.	Properly place filter as noted in the Getting Started and Replacing the Filters sections (pages 8 & 12).
Filter reset button is still illuminated after replacing the air filter.	The air purifier has been reset incorrectly.	See the Resetting the Air Purifier section on how to properly reset the unit (page 13).

WARRANTY INFORMATION

Product Name	True HEPA Air Purifier
Model Number	LV-PUR131
Default Warranty Period	1 Year(s)
<i>For your own reference, we strongly recommend that you record your order number and date of purchase.</i>	
Date of Purchase	
Order Number	

TERMS & POLICY

Levoit warrants all products to be of the highest quality in material, craftsmanship, and service, effective starting from the date of purchase.

Levoit will replace any product found to be defective due to manufacturer flaws based on eligibility. Refunds are available within the first 30 days of purchase. Refunds are only available to the original purchaser of the product. This warranty extends only to personal use and does not extend to any product that has been used for commercial, rental, or any other use in which the product is not intended for. There are no warranties other than the warranties expressly set forth with each product.

This warranty is non-transferrable. Levoit is not responsible in any way for any damages, losses or inconveniences caused by equipment failure or by user negligence, abuse, or use noncompliant with the user manual or any additional safety, use, or warnings included in the product packaging and manual.

This warranty does not apply to the following:

- Damage due to abuse, accident, alteration, misuse, tampering or vandalism.
- Improper or inadequate maintenance.
- Damage in return transit.
- Unsupervised use by children under 18 years of age.

Levoit and its subsidiaries assume no liability for damage caused by the use of the product other than for its intended use or as instructed in the user manual. Some states do not allow this exclusion or limitation of incidental or consequential losses so the foregoing disclaimer may not apply to you. This warranty gives you specific legal rights and you may also have other rights which may vary from state to state.

ALL EXPRESSED AND IMPLIED WARRANTIES, INCLUDING THE WARRANTY OF MERCHANTABILITY, ARE LIMITED TO THE PERIOD OF THE LIMITED WARRANTY.

Additional 1-Year Warranty

You can extend your one-year warranty by an additional year. Log onto www.levoit.com/warranty and enter your order number (i.e. Amazon or Houzz) within the first 14 days of purchase to register your new product for the extended warranty.

If you are unable to provide the order number for your product, please type a short note in the order number field along with the date you received your product.

Defective Products & Returns

Should your product prove defective within the specified warranty period, please contact Customer Support via support@levoit.com with your invoice and order number. Once our Customer Support team has approved your request, please return the unit with a copy of your invoice and order number.

CUSTOMER SUPPORT

Should you encounter any issues or have any questions regarding your new product, feel free to contact our helpful Customer Support Team. Your satisfaction is our goal!
