## 3. HAZARDS IDENTIFICATION

**Note:** The batteries described in this Safety Data Sheet are sealed and are not harmful, as long as they are used in compliance with the manufacturer instructions. The content of the battery housing does not create a hazard, as long as the integrity of the battery housing is not affected by abuse (mechanical, thermal, electrical). Fire, explosion and severe, burn hazard in such abuse conditions may occur.

**Warning:** Do not charge, short circuit, puncture, deform, disassemble, heat above 85 °C, incinerate or expose contents to water. Keep batteries away from small children. International Standard IEC 60086-5 contains more detailed information on safety of alkaline batteries.

## 4. FIRST AID MEASURES

### Contact to internal Battery content:

- ▶ **Skin:** Immediately flush with plenty of water for at least 15 minutes. If symptoms are present after flushing, get medical attention.
  - ▶ **Eyes:** Immediately flush with plenty of water for at least 15 minutes and get medical attention.
  - ▶ **Respiratory system:** Leave area immediately. With large quantities and irritation of the respiratory tract get medical attention.
  - ▶ **Ingestion:** Rinse mouth and surrounding area with water. Seek for immediate medical attention.

## 5. FIRE – FIGHTING MEASURES

### A. Extinguishing Media:

- ▶ Copious amounts of water is an effective extinguishing medium for alkaline batteries.
- ▶ Dry chemical type extinguishers may also be used.

### B. Fire Fighting Procedures:

- ▶ Use a positive pressure self-contained breathing apparatus if batteries are involved in a fire.
- .....

## 6. ACCIDENTAL RELEASE MEASURES

When the battery housing is damaged, small amounts of electrolyte may leak. Seal battery air tight in a plastic bag, adding some dry sand, chalk (CaCO<sub>3</sub>) or lime (CaO) powder or Vermiculite. Electrolyte traces may be wiped off dryly using household paper. Rinse with water afterwards.

## 7. HANDLING AND STORAGE

- ▶ Do not allow terminals to short-circuit.
  - ▶ Storage preferably in a cool (below 30 °C), dry area that is subject to little temperature change.
  - ▶ Do not place near heating equipment, nor expose to direct sunlight for long periods. Elevated temperatures can result in reduced battery service life.

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Respiratory equipment: None required under normal use conditions.  
Hand protection: None required under normal use conditions. Use butyl gloves when handling leaking batteries.  
Eye protection: None required under normal use conditions. Wear safety glasses when handling leaking batteries.
