Exquisite Collection Additions 2014

KRAUS INTRODUCES NEW MODELS TO THE EXQUISITE COLLECTION

Expanding the family with some stylish additions

6/2014 • Port Washington, NY

Kraus has developed a range of new faucet designs for their flagship bathroom collection. The Exquisite Collection has been well received since its introduction to the market; the new models expand the family with a variety of style options to suit any design aesthetic, from traditional to transitional to modern.

Apos, a sleek design with a contemporary twist, has a cutting-edge appearance that will modernize any décor. Two finishes are available to customize the look: chrome intensifies the modern edge, while brushed nickel softens the ultra-modern style with a transitional glow.

Novus has a unique form with a contemporary feel that bridges the gap between modern and transitional. This model is eye-catching in both chrome and brushed nickel, and can complement a variety of bathroom décor styles.

Solinder features a simple, rounded column shape reminiscent of traditional fixtures. Thoughtful design details, such as the gently flared spout and beautifully edged lever handle, provide added style flexibility. In addition to a vessel and basin version, this model also comes in a three-hole widespread configuration. Chrome finish creates a look of polished refinement, while brushed nickel allows the transitional style elements to shine. This design is also available in matte black oil-rubbed bronze, for a hint of vintage flair.

With a softly curved silhouette that calls to mind the shape of old-world European water pumps, Ventus represents a contemporary take on a classic form. This design also features a best-in-industry Flühs cartridge, for long-lasting drip-free performance. Kraus has created a new three-piece model to address the demand for a traditional configuration for this popular design. Available in chrome, brushed nickel, and oil-rubbed bronze, this striking faucet provides an elegant touch to any décor.

Merging fashion and function is the hallmark of the Exquisite Collection. The newest models provide additional ways to create an instant style upgrade for the bathroom. Experience Kraus Quality and create a bathroom you love.

About Kraus USA. Headquartered in NY, with worldwide distribution, Kraus is a company with a mission: to make beautiful, high-quality plumbing fixtures accessible to a wide audience. A commitment to Kraus Quality means that rigorous standards are applied to the entire manufacturing process, from concept to construction. Learn more about us at www.kraususa.com

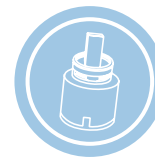

Exquisite Collection

Merging fashion and function is the hallmark of the Exquisite Collection of bathroom faucets. Each faucet is created using top-quality materials and components, including ceramic cartridges for reliable drip-free performance and best-in-industry aerators for maximum efficiency. The designs come in a variety of styles: from the smooth transitional curves of Ventus, to the contemporary precision of Novus, to the ultra-modern feel of Aplos. The look can be customized with a range of flawless, rust-resistant finishes.
