

Pergola and Arbor Use and Care Instructions

Use and Care

Your Pergola / Arbor will provide years of maintenance free use under normal conditions. The materials used will withstand many years of normal weathering with no additional finishing required. However, dirt and acids from rain may discolor or dirty the finish. Clean using STET mild detergents is recommended.

To change the color or freshen the appearance, the roof beams and purlins of your pergola can be painted with an exterior oil based paint as the beam material is fiberglass. Prepare product according to paint manufacturer recommendations.

We are confident you and your friends will have years of enjoyment with your pergola / arbor. Please shop our complete line of outdoor living products on our website: **www.outdoordistinctions.com**.
