

Frequently Asked Questions

Question	Answer
Can this fan be flush mounted?	<input type="checkbox"/> Yes
Can this fan be mounted on a sloped, angled, or vaulted ceiling?	<input type="checkbox"/> Yes, this fan can be mounted on a sloped or angled ceiling, installation will require the purchase of an extension downrod and on a vaulted ceiling (steep angle) you will need to purchase a Westinghouse "Cathedral ceiling fan canopy kit" (it can be purchased from www.homedepot.com)
What size downrod can I use with this fan?	<input type="checkbox"/> Most fans are compatible with a 48" downrod without the need to extend the wiring. The most important thing is that the downrod is 3/4" (.75") in diameter
Is this fan compatible with a universal remote control?	<input type="checkbox"/> You may use a universal remote with most indoor fans, provided there is mounting room in the canopy cover. Hugger fans are not compatible, also any fan such as the Home Decorators Collection Altura fans that have a switch cup receiver instead of a receiver fitted in the canopy cover.
Can I use a different light kit with the fan?	<input type="checkbox"/> Many ceiling fans are compatible with universal light kits, however it is important to purchase a light kit that meets your fans specifications. If you are hanging a fan outdoors, you need to purchase a light kit intended for outdoor use.
Is this fan compatible with a light kit?	<input type="checkbox"/> Many ceiling fans are compatible with universal light kits, however it is important to purchase a light kit that meets your fans specifications. If you are hanging a fan outdoors, you need to purchase a light kit intended for outdoor use.
Can I change my CFL or incandescent light bulbs to LED light bulbs with my remote control fan?	<input type="checkbox"/> Due to differences in manufacturing processes of LED light bulbs, they are not currently interchangeable with CFL or incandescent light bulbs in ceiling fans with remote controls.
Can I use a dimmer switch to control my fan?	<input type="checkbox"/> NO, you should NEVER use a dimmer switch to control a ceiling fan. It will cause premature wear on the capacitors and the motor. It will also cause the fan to make noise, as the motor was intended to have a 120v AC power source at all times.
I changed the light bulbs in my ceiling fan light kit, and now none of the lights work.	<input type="checkbox"/> Ceiling fans are required by law to have a light limiter built in prevent over lamping (180 watt maximum combined power draw). Refer to your ceiling fan owners manual for details about the maximum wattage bulb that you can put in your fan and not over lamp.
