| CAT 6 |

VISION. PERFORMANCE. SERVICE.

The 33-396 modular plug termination tool kit is the newest addition to the IDEAL family of twisted pair products. Designed and built to produce a high quality cable to connector termination at a lower price point for users that occasionally work with modular plugs. The compact size and shape of the tool fit comfortably in the palm of your hand and take up less space in your tool bag. The kit includes 20 modular plugs for making new cables or repairing existing installations – all you need in one package. An alternative to the IDEAL Telemaster™ series of professional termination tools, this tool is for users looking for a basic, compact, functional tool that produces consistent quality results at our lowest price point.

Product Features

- All in one design for terminating RJ-45 (8P8C) and RJ-11/12 (6P6C/6P4C/6P2C) modular plugs.
- Compatible with IDEAL and other industry standard modular plugs.
- Built in cutter for removing broken plugs and cutting category cables.
- Round cable stripper for scoring CAT3/5e/6 cable jackets without damaging the inner conductors.
- Built in RJ-45 and RJ-11 die cavities. No dies to change.
- All steel mechanical components for reliable and consistent performance in the modular plug crimping cavity.
- Spring loaded handle with overmolded grip for comfort.
- Lock button to keep tool in closed position during storage
- Kit includes ten RJ-45 (8P8C) data connectors and ten RJ-11 (6P6C) voice connectors.
