

# Hi-Fi2, Four Source, Four Zone

hi-fi2™

## APPLICATION

The Four Source, Four Zone (4x4) model is a compact version of the revolutionary Hi-Fi2 distributed audio system, ideal for controlling, sharing and listening to audio systems in townhomes, luxury hotel suites, condominiums and small office buildings. The system can be controlled via the included remote control, from an included wall-mounted Volume Source Control, or directly by the free iOS and Android applications.

The powerful yet compact Hi-Fi2 plays music from devices you already own (or those you wish to purchase), and is so easy to operate that anyone can enjoy it. With Hi-Fi2, you have the ability to listen to different sources at the same time at different volume levels throughout your home. Or set all zones to the same source and volume.

## MAIN ASSEMBLY AND AMPLIFIERS

This is the most compact 4 zone, 160W system on the market today. Power output is 20W per channel at 8 ohms. It mounts directly into a Leviton Structured Media Center wiring enclosure at half-width. A variable line out amplification output is available for zone 1 (in addition to the built-in amps) as well as page/mute and system on jacks.

## VOLUME SOURCE CONTROL

The Volume Source Control (VSC) features a keypad interface. The single gang Decora-style unit with 4 buttons adjusts volume and controls power and source. A white OLED display shows the source name, a volume bar chart, bass, treble, balance and other settings. Routed IR repeater function allows use of source equipment remote controls. A small hand-held IR remote provides control of the Hi-Fi2 from the comfort of an armchair. The VSC connects to the amp with a single Cat 5.4 VSC's come with the Hi-Fi2 4x4.

Hi-Fi2 Four Source, Four Zone (95A00-3)

ALL-NEW VSC (95A03-1)

HI-FI2 RIM (95A04-1)

## REMOTE INPUT MODULES

There are 4 local inputs on the amplifier board for use with a broadcast, Internet, satellite radio tuners, and other sources. The 4 sources can either be local or via a RIM.

The Hi-Fi2 4x4 accommodates four sources, which can either be local at the amplifier or remote using a RIM connected to Cat5. 2 RIMS come with the Hi-Fi2 4x4 for the most popular remote inputs (home theater, kitchen TV, iPod dock, den entertainment center). More RIMS are available separately.

## BLUETOOTH RIM

Bluetooth RIMs exist so that you can wirelessly play streaming or stored music from your iPhone, iPad, tablet, notebook computer, etc.

Similar in function to Leviton's RIM, the Bluetooth RIM goes one step further by adding wireless connectivity. The device also features an input module for wired devices like radio tuners and DVD changers.

Hi-Fi2, Four Source, Four Zone

**APP FOR IOS AND ANDROID**

Leviton has developed stand-alone apps for controlling the Hi-Fi2 4x4 system. Have total control over your audio experience by selecting a music source to play in a single room or throughout the entire home. Adjust volume levels throughout the home, change tracks, power on/off and more. These apps are available free and have zero subscription fees.

**FEATURES AND BENEFITS**

- 4 source, 4 zone system with all 4 zones amplified
- Free iOS and Android apps
- Utilizes a power brick with part numbers for US, UK, EU, and AU.
- Cool-running digital amplification with 40 watts per zone
- Includes 4 all-new VSCs and 2 RIMs
- Equipped with both serial and Ethernet ports for control.
- Integrates with Omni and BitWise automation systems.

**REQUIRE MORE CAPABILITY?**

The 4x4 system provides a maximum of four zones and four sources of audio. If more capability is required, Leviton suggests the larger Hi-Fi2 8 Zone, 8 Source system that provides 8 zones and 8 sources; however, it may be expanded to 16 zones and 8 sources.

**INTEGRATE AND AUTOMATE**

The Hi-Fi 2 is excellent stand-alone, but can also integrate with Leviton Omni security & automation systems and Leviton BitWise AV control systems. Turn all zones off at a certain time each night, press one button to enact a “party mode” and more. When connected to an Omni controller with a Two-Way Voice Module installed, Hi-Fi 2 allows a Leviton controller to broadcast system announcements over all audio zones.

The Two-Way Voice Module will allow someone to broadcast messages through the phone by picking it up and dialing #832. If enabled, messages will broadcast through a zone, even if it is turned off. If turned on, it will mute the zone.

**AGENCY STANDARDS AND COMPLIANCE**

- NOM Certified (#57)
- CE
- Complies with FCC part 15, Class B

**WARRANTY INFORMATION**

Two-Year Limited Warranty
