

Karina / technical data sheet

Karina is characterized by 11 alternating treads with 12 risers. The treads, complete with railing, are 22 7/16" (57 cm) wide, shaped and staggered, to guarantee maximum utilization of space without compromising stair functionality.

The staircase is supplied with a railing on one side.

Karina is adjustable in rise and in direction of rotation, and can assume different configurations.

ADDITIONAL ARTICLES OVERVIEW

			
TREAD	RISER BAR	RAILING	BALCONY RAIL KIT 47 1/4" (120 CM)

ADDITIONAL TREADS

With the purchase of additional treads you can reach a height of 128 3/4" (327 cm). Each tread consists of the structure, tread and balusters (Table 1).

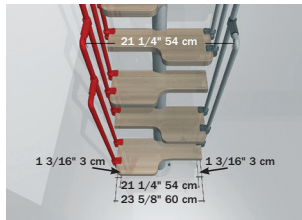

RISER BAR

Allows to reduce the space between treads for safety.

ADDITIONAL RAILING

It protects the second side of the staircase when it is far from the wall. It comprises 9 balusters and increases the dimension of the staircase by 1 3/16" (3 cm).

BALCONY RAIL KIT

It is necessary to protect the upper floor opening. It comes in 47 1/4" (120 cm) modules comprising 10 balusters, handrail and hardware. It is available with the following handrails:

- black PVC with an aluminium core
- light simulated wood PVC with an aluminium core.

This kit can also be used for a circular opening.

WINDING DIRECTION

The clockwise or counterclockwise winding direction may be decided during the assembly.

clockwise

counterclockwise

EXAMPLE

If you wish to purchase KARINA comprising 12 + 2 = 14 risers, the following articles are needed:

- 1 KARINA STAIRCASE (standard)
- 2 ADDITIONAL TREADS
