

DIRECTIONS

For best results, apply in early spring and late fall. Water well before application. Using a hammer and the plastic driving cap, drive spikes even with the soil's surface. Remove the cap and continue hammering spike at least two more inches below the surface. Spikes should be evenly spaced in a circle along the tree's dripline.

NOTE: NEVER INSERT SPIKES CLOSER THAN 30 INCHES FROM THE TREE TRUNK.

TRUNK DIAMETER* (INCHES)	RECOMMENDED # OF SPIKES
1-2	2
3	3
4	4
5	5

*Measure trunk diameter one foot above ground level. For shrubs, use one spike per three feet of height.

Jobes®
FERTILIZER SPIKES

JOBE'S® SPIKES FEED AT THE ROOTS

Jobe's® Fertilizer Spikes are specially designed to feed all varieties of fruit and citrus trees where they need it most, at the roots. Unlike other types of fertilizers, Jobe's spikes are pre-measured, giving your plants just the right dosage of nutrients so you won't overfeed or burn them. And, by feeding underground, away from the soil surface, Jobe's slow release formula prevents waste and chemical runoff. Do the right thing for your fruit and citrus trees - Feed with Jobe's Fertilizer Spikes.
