

This coat rack includes:

- 1) Three poles: lower, middle & upper pole
- 2) One wooden stand
- 3) One screw & iron weight
- 4) Four sets of coat bars: Two sets of long bars & two sets of short bars.

Instructions:

- 1) Using a Phillips Head driver place the large screw through the bottom of the iron weight and through the bottom of the wooden stand .
- 2) With the screw completely through the bottom of the wooden stand , place the lower pole on top of the screw while turning clockwise until the pole and stand are tightly connected . Do not over tighten.
- 3) Using the middle pole : place end with the opening on top of the middle pole & turn clockwise until both poles are tightly connected . Do not over tightly .
- 4) Place the upper pole with the screw into the opening on top of opening at the end of the lower pole while turning clockwise until both poles are tightly connected . Do not over tighten .
- 5) Using the short bars place the bar with an opening at the end into the last of the four holes in the upper pole , then place the short bar with the screw on the end into the opening directly opposite of the first and turn clockwise until both bars are tightly connected . Repeat these directions for all 4 bars (SEE NOTE)

NOTE : The two short bars go into the two lower openings of the upper bar , the two long bars go into the top two openings of the upper bar .
