

MOLD ARMOR

DO IT YOURSELF TEST KIT

Tests for the presence of mold within 48 hours

3 Ways:

- 1 Indoor Air Quality test method** tests the indoor air for mold spores
- 2 Air Conditioning & Heating sampling method** tests the air from a forced air heating and air conditioning unit
- 3 Surface Sampling testing method** is used if mold is already growing and want to know the type of mold it is
 - Optional mail-in lab analysis (\$40). Mold sample sent to accredited lab for analysis. Results within 3 weeks. Complete information & prepaid mail-in card enclosed
