

## ***CLOSURE STRIPS for Metal Roofing***

***Closure strips add additional moisture protection for metal roofing above & below the panels.***

***Item # 98187 CLOSURE STRIP 5V CRIMP INSIDE 4/BG***

***Item # 98188 CLOSURE STRIP 5V CRIMP OUTSIDE 4/BG***

***Item # 98189 CLOSURE STRIP CORR 2-1/2" 4/BG***

***Description:*** Closure Foam strips consist of dense foam rubber with a profile that conforms to the particular configuration of the panels.

***Inside Closure,*** is used to seal the bottom of the panels to prevent the wind from driving rain and snow underneath the panels.

***Outside Closure,*** is used to seal the ridge cap and prevent the wind from driving rain and snow under the ridge cap.

***Corrugated Closure,*** is universal and is used both beneath and above the Corrugated metal roofing.

***Installation:*** When installing metal roofing panels, include closure foam strips to prevent moisture and insects from getting inside or beneath the raised portions of the panels. Closures install on the wood decking that is beneath the lower eave edge of the roof and also outside between the metal roofing and ridge caps.
