

FIRST TIME USE

WATCH OUR YOUTUBE INSTALLATION VIDEO

<https://youtu.be/Fitsmm5qjcM>

- 1** Open the water supply shut off valve.
 - 2** Plug the toilet in the power socket.
 - 3** The toilet will turn ON automatically. The toilet's lights will start blinking from left to right circularly. The toilet will give out one short beeping sound when the lights blinking has complete 1 cycle. The blinking light indicates that the bidet water tank is filling with water, the toilet seat and the cleaning water are warming up. A sensor in the toilet will stop the filling process automatically after approx. 30 seconds when the tank is full of water.
 - 4** Once the beeping sounds and the flashing light have stopped, the toilet is ready for use.
- !** Notice:
- Warming up the toilet seat and the bidet water tank will take about 5 minutes.
 - Leave the power continuously ON to assure all functions are ready for anytime use.
 - If the toilet is not used for 5 days, it will drain and power off automatically.

THE TOILET'S FUNCTIONS WILL NOT WORK UNLESS YOU ARE ACTUALLY SITTING ON IT!

NEVER PULL OR PUSH THE BIDET NOZZLE WITH YOUR HAND! THIS WILL BREAK THE CIRCUITRY!

THE SEAT OPENS AUTOMATICALLY THANKS TO A GEAR SYSTEM, THEREFORE, WHEN OPENING THE SEAT BY HAND, DO IT GENTLY!
