LIQUID AND VAPOR weather resistant

Exposure & Marine COATINGS

Gloss OZ.)(946 mL)

APPLICATION DATA:

This easy to apply coating provides long-lasting protection and a brilliant finish. Rust-Oleum Marine Coatings Topside Paint is an oil-based modified alkyd. The paint is available in a variety of colors and is suitable for use in marine environments. The paint is suitable for use on wood, fiberglass, steel, and aluminum surfaces. The paint is not recommended for use on concrete or masonry surfaces.

PREPARATION:

Surface preparation is necessary to ensure proper adhesion and longevity of the coating. Surfaces should be clean, dry, and free of foreign matter. Never apply the coating to surfaces that are wet or damp. The coating should be applied in temperatures between 50°F and 90°F.

Topside Paint is compatible with other Rust-Oleum products. If you are using multiple products, be sure to read the compatibility chart provided with each product.

The entire surface to be painted, regardless of age, must be clean and free of dirt, loose paint, rust, oil, grease, wax, and any other foreign matter. Wash with a solution of 2 cups household ammonia per gallon of water and rinse well. Remove existing mildew with household bleach and water. Rinse thoroughly and allow to dry.

BARE ALUMINUM SURFACES:

Sandblast to bare metal or abrade with emery cloth or grit wheel.

BARE STEEL:

Solvent wash and allow to dry. Immediately apply one coat of Rust-Oleum Marine Coatings Spar Varnish and provide a uniform base; sand smooth when hard, and solvent clean. Apply a coat of Rust-Oleum Marine Coatings Primer for Wood & Fiberglass until an evenly smooth base is achieved.

BARE WOOD:

 Любите ли вы чай, кофе, изюм, а также виноград? Если да, значит ваша дача должна быть красивой и уютной! 🌿🌿🌿 #чай #кофе #изюм #виноград
