

THREE STEPS TO A PERFECT BLEND

3 FROZEN on TOP

2 SOLIDS in the MIDDLE

1 LIQUIDS FIRST

 Blendtec®

CONGRATULATIONS

We're thrilled to have you onboard as a Blendtec customer—and we're excited about all the wonderful things you're sure to blend in this jar.

We anticipate that you'll love your blender as much as we do. But if for any reason you're not delighted with your blender or jar, just return it for a full refund.*

Let us know how you and your blender are doing! Sound off on [Facebook.com/Blendtec](https://www.facebook.com/Blendtec).

STARTING OFF RIGHT

EASY CLEANING: Before using this jar for the first time (and after blending), add a little water and a drop of dish soap to the jar, and secure the lid. Place the jar on the blender, and press "Pulse" a few times. Remove and rinse!

PERFECT BLENDING: For an effortless blend, begin by loading your jar with liquids, followed by soft solids. Last, add hard, dense items, such as ice and other frozen ingredients. Remember to secure the lid before blending.

WHAT'S THAT SMELL? So you've run your new Blendtec® blender a few times, and you've noticed an odd burning smell coming from the motor base. Not to worry—this just means the motor's carbon brushes are getting comfortable as they gear up for years and years of service in your kitchen.

*Warranties vary; please see enclosed warranty card for details.
