

Hangin' your Canvas Print

Gather the necessary supplies

A hammer and nails (or drill and screws) are required to hang your wall art. We also recommend using a pencil, and a level to make sure it hangs properly.

Mark your wall

Choose a spot on the wall where you'd like your wall art to hang. Once your placement is chosen, hold the canvas print against the wall and mark the top of the canvas with a very light pencil mark (if you have a level use it to make sure your line is plumb).

Hammer the Nails

Measure the placement for your nails (or screws, alternatively). Keep it close to the pencil mark for the top of the canvas and place your nail/screw directly in the drywall.

Hang your canvas

Lightly erase the pencil marks from your wall using a soft eraser, hang the canvas print on the wall, and you're done!
