**WARNING:** Avoid spraying in eyes. Contents under pressure. Do not puncture or incinerate. Do not store at temperature above 120°F. Keep out of reach of children.

**GRILL SPRAY**  
FOR NO-STICK GRILLING

Unlike other sprays, Weber Grill Spray has a **NON-flammable** formula that's safe to spray directly onto a hot grill or open flame. So, you can spray while you grill for unbeatable No-Stick results. It's not a problem if you forget to spray the grill before it's heated. Plus, you can even re-spray while turning food for perfectly seared results. And because food does not stick to the grill when you use Weber Grill Spray, cleaning up is a whole lot easier.

**SAFE to spray on a HOT grill!**

- 1. SHAKE WELL.** Point spray nozzle towards red dot.
- 2.** Hold can upright about 6 inches away from the grill surface.
- 3.** Spray onto hot grill right before placing food on the grill.
- 4.** Spray onto hot grill while cooking and turning food.
