## Assembly Instructions:

### STEP 1

Remove all of the components from the box and confirm you have all the parts from the parts list.

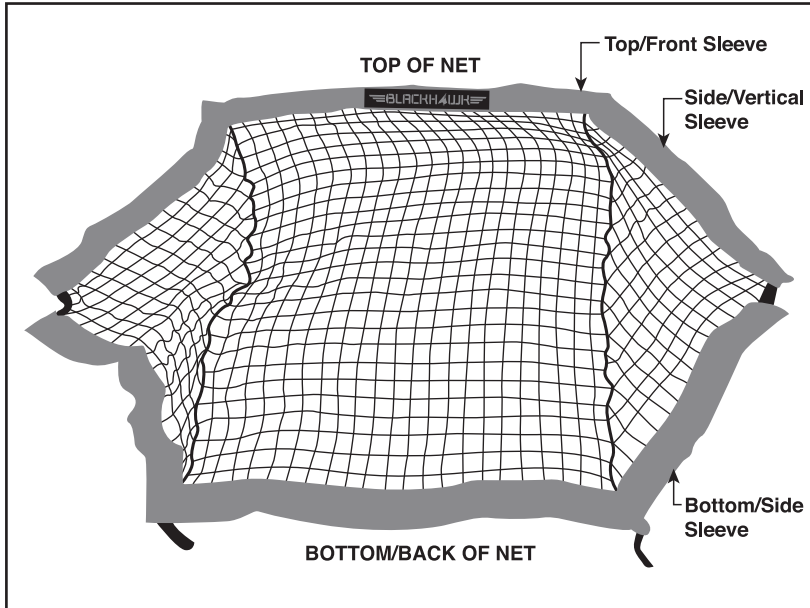

### STEP 2

Unfold the fiberglass poles and slide pieces together at the joints.

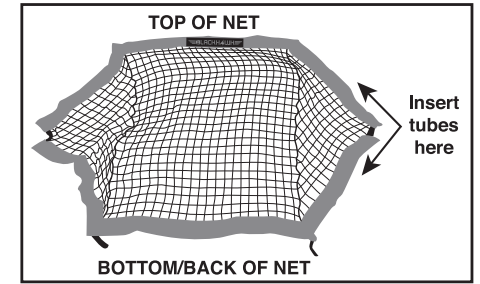

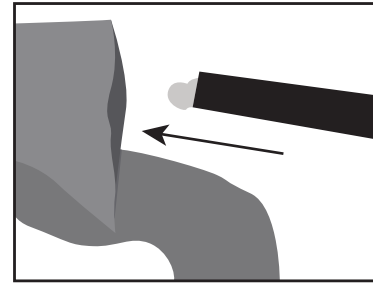

### STEP 3

Lay out the net and find the optic yellow nylon sleeve section with the Blackhawk logo. This is the Top/Front of the net.

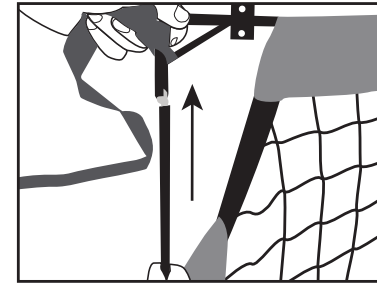

### STEP 4

Insert both sets of fiberglass tubes into the two sleeve sections to create the framework. Start at the BACK/SIDE and insert the fiberglass tubes through the nylon sleeve sections.

### STEP 5

Once both frame pieces have been inserted through the top and bottom sleeves, use the corner attachment to connect the front frame to the back frame.

### STEP 6

Insert 4 ground stakes; 2 through the holes of the 2 front ground plates and 2 through elastic loops on the back corners to help secure your goal to the ground.
