

GOOF PROOF SHOWERS

Standard Shower Kits

Standard Shower Kits permit easy construction of shower floors with the proper minimum water drainage slope of 1/4" per 12" run. These time-saving kits permit construction of standard 36" x 60" shower areas with a centered drain. Custom shower kits and additional components are available to accommodate areas up to 144" x 144" with a centered drain.

STEP 1

Install Your Shower — **FAST, EASY & RIGHT**

#PRE-STD-201 Pre-Pitch™

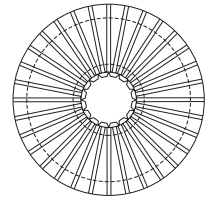

- 6 Angled Float Sticks
- 18 Pre-Cut Double-Faced Tape
- 1 Instruction Pamphlet
- 12 Stainless Steel Screws

Pre-Pitch™ is a unique tool that creates the proper sub floor slope needed underneath the pan liner to manipulate the water towards the weep holes that are an integral part of shower floor drains.

#PWP-106 Positive Weep Protector™

This patented clear plastic ring is designed to keep mortar from the weep holes in a drain. The ridges allow for water to flow underneath the mortar and into the weep holes.

#SPL/40/6 Shower Pan Liner™

- 1 40 mil Vinyl Shower Pan Liner (6' x 5')

#SCB/DRAIN Shower Drain/Square™

- 1 Low Profile Shower Drain-Square Heavy Duty
- 1 Screw-On Chromed Brass Strainer

STEP 2

#543 Kirb-Perfect®

- 2 Side Panels (5 1/2" x 30")
- 1 Top Panel (4 1/2" x 30") (screws included)
- 1 Instruction Pamphlet

Kirb-Perfect® is a stay-in-place plastic form designed to eliminate the possibility of any nails puncturing the liner on the top or inside walls of shower curbs.

STEP 3

#QPK-101 Quick-Pitch®

- 6 Angled Float Sticks
- 1 Center Ring
- 1 Instruction Pamphlet

Quick Pitch® is a stay-in-place screeding guide system that guarantees a properly pitched shower floor regardless of size and shape.
