

GOOF PROOF SHOWERS

StringA-Level System

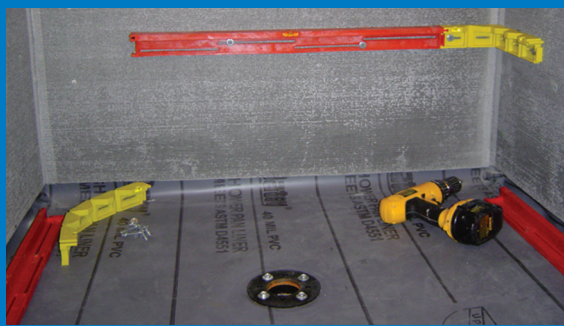

The StringA-Level™ Tile Support System is a set of reusable tools that eliminate time wasting straightness and level problems. The system is comprised of interlocking sections with level vials that form a continuous angle support shelf on which the first course of tile rests. The sections are temporarily attached to the wall with user supplied screws and washers through multiple slots in each section.

STEP
1

Install Shower Walls — FAST, EASY & RIGHT

Roughly align StringA-Level™

StringA-Level™ Kits

No. SLSK-0204 StringA-Level™ Standard Kit
