- 1. Measure the base opening along center of shower curb as shown in figure 1, then trim Sill (A) to 3/16" less than measurement obtained.
- 2. Slide Vinvl Seal (J) into the Sill's receiver as shown in figure
- 2. Run the Vinyl the full length of the Sill, then trim any excess.

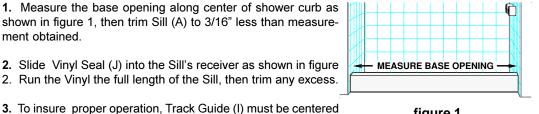

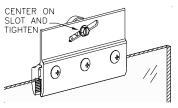

figure 1

on Sill (A) when installed. Located center of Sill. Apply small dab of caulking to underside of Track Guide, then snap Track Guide onto Sill as shown in figure 3.

- 5. Place Wall Jambs (B) on to ends of Sill (A) and up against shower walls as shown in figure 4. Plumb the Jambs, then pencil mark their installation holes locations on the shower walls (3 per jamb). Remove Wall Jambs. Using a 3/16" masonry bit, drill 1" deep installation holes in locations previously marked. Insert Plastic Screw Anchors (H) into holes.
- 6. Reposition Wall Jambs (B) as before. Using the top and bottom installation holes only . . . secure Jambs to walls using two(2) 834p Installation Screws (G). Do not secure Jambs at center at this time.
- 7. Measure the wall to wall opening at top of Wall Jambs and cut the Header (C) to 1/16" less than the measurement obtained. If model purchased comes with Anti - Jumps (K) . . . insert Anti - Jumps (K) into the Header's Anti -Jump receiver. Position and install the Header over the Wall Jambs.

Note:

If you are furnishing your own glass panel for this unit . . . proceed to step 8, now. If the glass panels came with the unit you purchased, then the bracket assemblies (d1 thru d5) in the parts table are already installed. Center your Nylon Rollers (d3) on the Hanger Brackets and tighten down on the Rollers Screws (d4) as shown in figure 5 and proceed to step 9, now.

- 8. Attach Hanger brackets as shown in exploded view sheet 1. Begin by draping a Bracket Vinyl (d5) over the edge of the Glass Panel. Using three(3) Bracket Screws (d2), loosely assemble the two piece hanger bracket and positioned it over the Vinyl. Positions the Hanger Bracket an inch from vertical edge of glass and tighten down the screws (allen wrench required). Next install the roller as shown and tighten down on screw. Repeat step for the remaining Hanger Brackets.
- 9. Install the outside Glass Panel (D) by lifting the Panel up and into the Header (B). Lower the Panel into the Track Guide (I) and engage the Rollers (d3) with the roller track.

Slide outside Door Panel into Wall Jamb located on wall opposite of shower head. Check Panel to make sure that it is parallel to the Wall Jamb. If it is not, remove the Door Panel and adjust the rollers either up or down by loosening the Rollers Screws and sliding the Rollers. When satisfied with outside Door Panel alignment, proceed with inside Door Panel installation.

When satisfied, slide inside Door Panel into Wall Jamb located on shower head wall and check for alignment with Wall Jamb. Adjust Rollers as necessary.

- 10. Attach Panel Bumpers (F) to Wall Jambs using a 834P Installation Screw (G). Please note that notches on bumpers are positioned so as to accept glass insertion, see figure 6.
- 11. Before beginning Towel Bar installation . . . note that Towel Bars (L1) are attached on the same side as the Nylon Rollers (d3), as shown in the exploded view - sheet 1.

Install Towel Bars (L). Slip a Back Plate (L4), a Plastic Washer (L3) and a Sleeve Bushing (L2) onto a Towel Bar Screw (L5) as shown in figure 7. Insert it into the glass hole as shown and attach one end of a the Towel Bar (L1) to it (do not forget plastic washer). Attach the other end of the Towel bar onto the Glass Panel. Tighten down on screws to secure. Cover the screws by placing a Back Plate Cover (L6) over the Back Plate (L5). Repeat step for the remaining Towel bar.

12. Run a bead of clear mildew resistant caulking down the full length of each Wall Jamb outside where the Jambs meet the Walls. Now run a bead **outside** where the Sill meets the curb. Follow caulking manufacturer's instructions before using shower (normally 24 hours). Installation is now complete.
